Work Experience

Bonterra – Senior Product Designer

August 2023 - Present

- Leading the design of an AI-powered data reporting platform that enables users to access deep analytics and insights across data sources
- Designed a mobile app for case workers to record their client interactions on the go
- Created data mapping features for a case management platform empowering customers to generate reports on standardized data
- Built a React-based, interactive prototyping environment for teams exploring new product features, complete with reusable components and page templates for accelerating work
- Defining accessible and reusable patterns for a case management platform

SINAI Technologies – Product Designer

May 2022 - March 2023

- Owned the end-to-end redesign of key features of the core product, including mapping user flows, building information architecture diagrams, and creating low- and high-fidelity designs
- Worked with product management to define scopes of work and prioritize features for MVP and later releases

Amount – Senior Product Designer

November 2020 - April 2022

- Spearheaded the design of a platform enabling retailers to manage the end-to-end customer order experience, including dispute management, purchase/shipping status, and financial settlements
- Contributed to the creation of a net-new white label digital banking platform

IA Collaborative – Senior Interaction Designer

July 2018 - July 2020

- Redesigned key flows of the investment management and trading website of a major U.S. financial firm based on several rounds of user research
- Conducted user research in India and designed new features for the mobile app of a Fortune 100 shipping and logistics company

SAP – User Experience Designer

July 2016 - June 2018

- Lead UX designer of data analytics components and design guidelines for a joint iOS design system from SAP and Apple
- Worked with Apple's Enterprise Labs to lead app design workshops, interview users, and build and validate designs with clients
