BULK HIGH-SPEED DEPOSIT

THE FASTER WAY TO BANK CASH. DESIGNED FOR BUSY CUSTOMER ENVIRONMENTS.

Built for high-volume environments, the Next Payments Bulk High-Speed Deposit validates and banks cash at speed. Used by itself or alongside a Cash Recycler, it delivers faster access to funds, enhanced security and improved cash flow.

HOW THE BULK HIGH-SPEED DEPOSIT WORKS

1. **Deposit Large Volumes, Fast**
   Notes of all denominations are deposited in bulk at speeds of up to 720 notes per minute, dramatically reducing time spent handling cash.

2. **Validate & Detect Counterfeits Instantly**
   Each note is automatically authenticated during deposit, helping protect your business from counterfeit risk.

3. **Secure High-Capacity Storage**
   Reduce cash handling costs through smarter internal cash optimisation, with capacity to securely store up to 10,000 notes.

4. **Bank Funds When You Choose**
   Funds can be settled to the bank account of your choice, at any time, improving access to cash flow and reducing reliance on manual banking runs.

5. **Simplify Reconciliation Across Departments**
   Multiple departments can be set up for clear allocation and tracking, with deposits remotely reconciled through Next Payments' Concilio software.
