Robinia Two-Seat Post Swing

Materials & Construction

Posts: Three Robinia posts in a row, 1.6 m apart and 1.6 m high, set in concrete
Seats: Two belt seats on chains, slung between the posts, about 0.4 m above the ground
Weight: 95 kg in total; largest part 2.5 m long, 30 kg
Installation: About 4 hours

Free-fall height is 0.8 m and the supplier states no impact-absorbing surfacing is needed, so the swing can go on grass (BS EN 1176-1 allows turf up to 1.0 m).

Images are computer visualisations; the installed product will look similar. Colours may vary from those shown.

How to Use

Post swing

Two children swing side by side on belt seats hung between three upright Robinia posts, with no crossbar overhead.

Benefits:

Builds core strength and coordination, gives a calming, rhythmic motion and suits younger children from age 1.

Inspection & Maintenance

Routine visual check weekly (daily on busy sites), an operational check every 1–3 months and a main inspection once a year. Check the swing fixings, chains and seats for wear, and the posts for movement. Morti Sport & Play offers annual inspection and maintenance for school and public sites.

Why Choose This Product

A simple, low swing on three natural Robinia posts, with no crossbar, that can go on grass.

- Free-fall height of 0.8 m, so it can go on grass
- Low seats suit children from age 1
- Installs in about four hours
- Designed, supplied and installed by Morti Sport & Play's own teams
