ULTRA-CONTROLO

Probes

Probe - BS 5682

OXYGEN THERAPY & ASPIRATION

Probes

Probe - BS 5682

The BS coupling complies with BS 5682; through the coupling it is possible to draw the desired medicinal gas from the medical-hospital system; each differs in size in such a way as to prevent interchangeability and therefore allows the assignment of each individual coupling to the respective corresponding gas outlet.

Features

- BS 5682 profile
- In-line or 90° elbow outlets
- Multiple gas variants

Standards

- EN ISO 9170-1
- BS 5682
- EN ISO 15001

Components

- Body in chemically nickel-plated brass specific for each gas
- Marking of the type of gas on the body

GAS	OUTLET	CONNECTION	WEIGHT
O2	In line	G1/4" F R	0.08 kg
Air 400	In line	G1/4" F R	0.08 kg
N2O	In line	G1/4" F R	0.08 kg
Vac	In line	G1/4" F R	0.08 kg
Air 800	In line	G1/4" F R	0.08 kg
O2	In line	Hose connector Ø6 mm	0.06 kg
Air 400	In line	Hose connector Ø6 mm	0.06 kg
N2O	In line	Hose connector Ø6 mm	0.06 kg
Vac	In line	Hose connector Ø8 mm	0.06 kg
Air 800	In line	Hose connector Ø6 mm	0.06 kg
O2	90° elbow	Hose connector Ø6 mm	0.13 kg
Air 400	90° elbow	Hose connector Ø6 mm	0.13 kg
N2O	90° elbow	Hose connector Ø6 mm	0.13 kg
Vac	90° elbow	Hose connector Ø8 mm	0.13 kg
Air 800	90° elbow	Hose connector Ø6 mm	0.13 kg
