Career Objective

As a highly motivated and execution-driven web developer with experience building full-stack applications using React, Node.js, and both MySQL and NoSQL databases, my goal is to work in a collaborative environment where I can continue to grow my skills. Seeking a company where I can contribute to meaningful web solutions and make a significant impact.

Experience

Junior Web Developer **2025 - 2026**
Staxx Digital

Collaborated with the team to build and maintain responsive web applications. Responsibilities during the website building process included:

- Designed pages and mockups in Figma for client
- Worked with the team to get design approved
- Developed the pages using HTML, CSS, and JavaScript
- Collaborated with client to receive feedback and then made updates after assessing feedback
- Participated in debugging, testing, and troubleshooting

Starbucks **2019 - 2026**
Barista

Self-sufficient and able to work in a fast-paced, high-pressure environment. Efficiently able to handle multiple tasks in a timely manner. Responsibilities included:

- Engaged with customers, prepared drinks, and managed transactions independently
- Demonstrated a strong work ethic and trained numerous coworkers

Projects

Asch Building Website **2026**

Created a website for Asch building, which is a collection of small businesses. The mockups of the website were done in Figma and then built the design in Squarespace. The website consists of a home page, events page, visit page, and shops page. Also fixed mobile breakpoints so that the website remains responsive. Once finished, showed the client the website to receive feedback and then made the final updates before transferring the site to them.

Nandina Rem Website **2026**

Created a website for Nandina Rem, which is a company that recovers and remanufactures carbon fibre. The mockups were done in Figma and then built the design in Wix Studio. Fixed the mobile and tablet breakpoints to make the website responsive. Then showed the client the website and made final updates after feedback.
