Blue Origin Citizen  
Astronaut

Former NASA  
Rocket Scientist

Founder and CEO of  
STEMBoard & LINGO

Entrepreneur,  
Global Speaker +  
Thought Leader

## MEDIA KIT LET'S COLLABORATE

## FOUNDER OF STEMBOARD

STEMboard brings together bright minds from a variety of backgrounds and delivers high-quality solutions to help advance our nation and its citizens.

Aisha desires to expand access to young women and underrepresented STEM communities. LINGO, a self-paced coding kit that empowers learners with technical concepts at-home, is currently used by over 4,000 students in America.

# About Aisha

Aisha Bowe is a former NASA rocket scientist, award-winning founder, and citizen astronaut who is redefining what it means to lead in science, education, and innovation. In 2025, she flew aboard Blue Origin's New Shepard rocket as part of a historic all-female crew, conducting NASA-backed research and flight-qualified experiments in microgravity. She is the founder of STEMBoard, a tech company, and the creator of LINGO, an edtech startup bringing hands-on STEM education to students around the world.

Aisha's inspiring journey from community college to space has captivated global audiences. She reminds us that the world "impossible" is only a suggestion.

## LEAVING AN IMPACT
