Forever Green

Why choose our air cushion system?

1 99% air, 1% film

Return 2 Recycle

Cushions are made on demand from a compact roll of film and are mostly air. The film carries recycled content and is recyclable, with free Return 2 Recycle.

2 One system, many applications

Seven film sizes, from 200mm cushions to 800mm bubble quilts, on a single machine. One system replaces shelves of pre-made materials.

3 Multiple cost savings

Lower material, storage and delivery costs. One roll replaces 5+ bags of peanuts, and costs around 70% less than peanuts and bubble wrap.

4 Affordable machines

Shadow Boxer Mk2 from £295 (ex VAT). Free loan or rental options are available, agreed case by case.

5 No minimum orders or contracts

Order film from a single roll, when you need it. Nothing to sign up to.

6 Personal service & support

Demos, installation and training if you want them, servicing and technical support. Manuals and operator videos online.

Pack Proof: our free Try Before You Buy service

Send us one of your typical orders. We repack it exactly as it would go out, using the right material, amount of material and technique, and post it back to you free. Nothing to buy or sign.

One roll gives about 5.4 bags of 15 cu ft peanuts (2.3 m^3 inflated); the exact equivalent varies with pack style. Prices ex VAT. Savings vs peanuts and bubble wrap are a conservative estimate.
