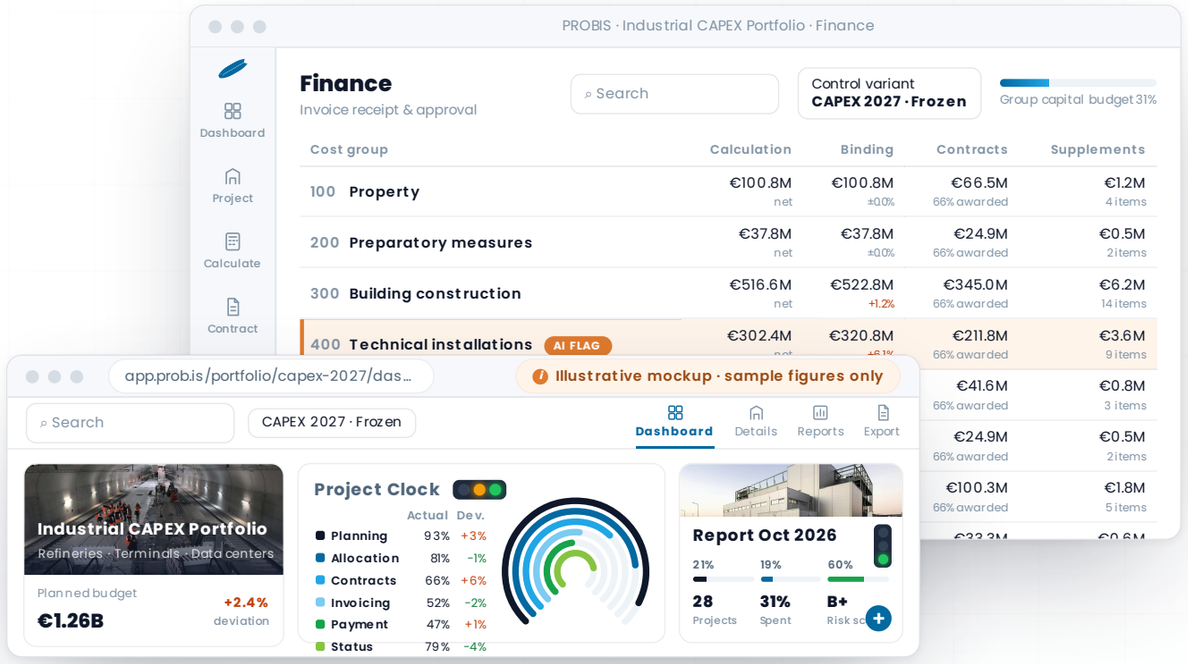
REAL-TIME CAPEX CONTROL WITH PROBIS AI

# Real-time CAPEX control for refineries, infrastructure *and data centers.*

Automated multi-project cost control built for refinery-grade complexity. AI-driven cost, liquidity and performance oversight across BP Europa's industrial, infrastructure and data center investment programs.



## 01 Built for

- Refinery and fuels supply operators
- Industrial and energy infrastructure developers
- Capital project and portfolio managers
- Executive board and finance stakeholders
- EPC and engineering contractors
- Data center and digital infrastructure teams

## 02 What we address

- Multi-source reporting burden across refineries, terminals and sites
- Siloed project and financial data across business units
- Fragmented systems across CAPEX, OPEX and data center environments
- Limited real-time visibility into portfolio-wide spend
- Elevated delivery and financial risk on major capital programs

## 03 Your value with PROBIS

- Real-time transparency across every refinery, terminal and site
- Automated reporting for faster stakeholder alignment
- Early risk detection across capital, infrastructure programs and data centers
- Benchmark-driven insights for capital allocation decisions
- End-to-end control from planning through operations

**−35%** Risk reduction

**+20%** Return on asset investment

**+15%** Value increase

RELEVANT CASE STUDY

RTW REGIONALTANGENTE WEST

# Regionaltangente West: *one central platform.*

RTW Planungsgesellschaft mbH relies on PROBIS as its central system for transparent cost management, financial reporting and project controlling across a complex, multi-phase infrastructure program in the Frankfurt region.

### CENTRAL PLATFORM FOR BUDGET, COST & PORTFOLIO MANAGEMENT

- Transparent overview of cost status and forecasts across all subprojects
- Cloud-based dashboards with real-time project data, accessible across teams and departments
- Standardized processes for requirements, budgeting and cost control, replacing fragmented, siloed tracking
- Efficient collaboration among all project stakeholders, from planning through delivery

PROBIS creates the foundation for transparent, future-proof financial management across a large, multi-project portfolio.
