SUCCESS STORY: MASTERFIRE

From Storage Crisis to Success

MASTERFIRE

MasterFire Life Safety Systems Ltd. is a leading provider of fire protection and life safety solutions, specializing in the design, installation, and maintenance of fire suppression systems, emergency lighting, and other critical safety equipment. With a commitment to protecting lives and property, MasterFire serves a diverse range of clients across various industries.

RESULTS ACHIEVED

7.5x ROI

$57K annually saved on storage costs

THE CHALLENGE

MasterFire Life Safety Systems Ltd found themselves racing against time. Their NetSuite storage was maxed out, and with their renewal date approaching, they faced substantial penalty costs if they couldn't reduce their storage footprint. The company needed a swift, selective approach to data management that wouldn't disrupt their daily operations.

STRATEGIC SOLUTION

Tvarana, in collaboration with MasterFire, developed a strategic, five-pronged approach:

1. **Targeted Migration:** Developed specialized scripts to selectively transfer critical data from NetSuite to SkyDoc, ensuring no business disruption.
2. **Automated Archiving:** Implemented SkyDoc's Auto-Sweep feature to automatically archive less frequently accessed files to cost-effective AWS S3 storage.
3. **Data Integrity Guaranteed:** Thoroughly reconciled data between NetSuite and SkyDoc to ensure data accuracy and accessibility remained intact.
4. **Precise Deletion:** Implemented a sophisticated deletion utility to remove unnecessary files while preserving essential operational data.
5. **A Sustainable Future:** Established a long-term data management strategy to prevent future storage bottlenecks.

THE OUTCOME

- **Dramatic Reduction:** Reduced NetSuite storage from a staggering 220GB to a manageable 50GB in just 9 days.
- **Avoided Costly Penalties:** Successfully averted the risk of exorbitant overage charges from NetSuite.
- **Uninterrupted Operations:** Ensured business continuity throughout the entire storage reduction process.
- **A Blueprint for Success:** Created a proven framework for other organizations facing similar storage challenges.

BEYOND THE NUMBERS

This project exemplifies the power of strategic data management. MasterFire not only resolved their immediate storage crisis but also established a robust foundation for future data growth and optimization. This success story demonstrates how businesses can effectively manage their NetSuite data while minimizing costs and ensuring operational efficiency.
