Sterisol Sweden
Hand Disinfectant SENSE+

Properties

SENSE+ is a liquid, fragrance-free hand disinfectant developed for both hygienic and surgical use. The product is based on pharmaceutical-grade bioethanol, denatured with isopropanol and t-butanol.

The formula contains cetyl alcohol and glycerin, which help counteract drying of the skin. As the product is free from thickening agents, it can be used regularly and in larger amounts without leaving residue on the skin. This makes it particularly suitable for environments where gloves are frequently used.

Field of Application

Surgical Hand Disinfection
The product should be used in accordance with national or local recommendations for surgical hand disinfection. See also the instructions for use on the next page.

Hygienic Hand Disinfection
The product is suitable for hygienic use in healthcare, the food industry, preschools and any environment where regular hand washing with soap is not possible or sufficient.

STERISOL SENSE+ Hand Disinfectant

Packaging	Art. no	No. in ctn	No. Ctn/ pallet	No. on pallet	EAN-code	Packaging/litre of product
5000 ml	5128	3	27	81	7392173051280	70 grams

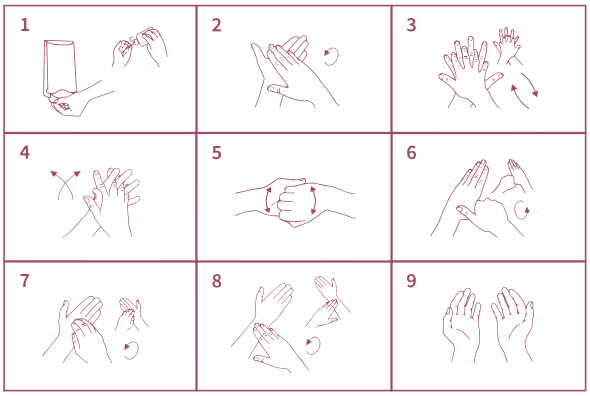
How to use

Hygienic Hand Disinfection

Hands must be clean and completely dry before hand disinfection is performed. Cup one hand and apply at least 3 ml of Sterisol Hand Disinfectant SENSE+.
Rub thoroughly over all areas of the hands for ***at least 30 seconds***, or until the disinfectant has evaporated and the skin feels dry again.



Surgical Hand Disinfection

1. Wash hands and forearms with Sterisol Liquid Soap before using Sterisol Hand Disinfectant SENSE+. Dry hands and forearms completely with a disposable paper towel.

2. Apply a generous amount of Sterisol Hand Disinfectant SENSE+ so that the skin remains wet for ***90 seconds***.

3. Ensure that the product covers all surfaces of the hands, wrists and forearms up to the elbow. Massage thoroughly into the skin for at least 90 seconds.

4. Allow the skin to dry completely before putting on gloves.
If gloves are punctured or torn during surgery, they should be removed. The hands may then have become contaminated, and hand disinfection should be repeated according to the instructions above.

Use biocides safely. Always read the label and product information before use.

Highly flammable liquid and vapour. Causes serious eye irritation.

Important!

Hands and forearms must be completely dry before using Sterisol Hand Disinfectant SENSE+.

Rub the product thoroughly into the skin for the full specified contact time: at least 30 seconds for hygienic hand disinfection and at least 90 seconds for surgical hand disinfection.

For surgical hand disinfection, local hygiene routines and guidelines must always be followed. The instructions above describe the recommended use of Sterisol Hand Disinfectant SENSE+.
