Practice Intelligence®

AI-powered pathology detection plus PMS integration to maximize production and patient health in your practice.

AI-guided interactive daily schedule

Treatment opportunity toolset

Intelligent recall & marketing lists

Clinical performance dashboard

Second Opinion® real-time detections

> The future of dentistry has advanced because of Pearl. Not only is the dentist equipped to give a better diagnosis and deliver better healthcare to the patient, but now the front office can identify a patient's needs before they come in so that, when they come in, we are more organized and more prepared to treat them.
