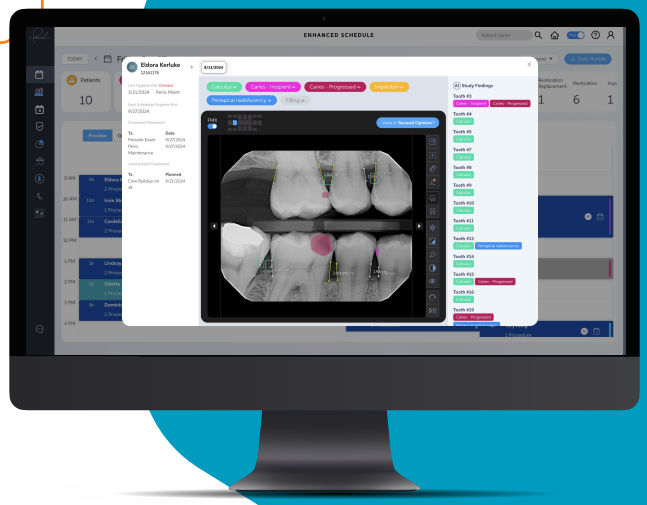
Practice Intelligence®

A complete PMS-integrated dental AI toolset to unleash practice performance.



Pearl's AI-powered pathology detection plus PMS integration delivers actionable insights that help your clinical and front office teams maximize production and patient health in your practice.

More same-day dentistry

Pearl's AI anticipates the treatments your patients require before they take a seat, empowering you to efficiently schedule chair time and foster team-wide collaboration to enhance daily production.

More productive recall

Harness the power of AI-guided patient recall and marketing lists to strategically target patients with the most urgent clinical needs, resulting in a thriving practice and improved patient health.

Smarter staffing & procurement

Ensure you always have the supplies, equipment and team members to cater your patients' needs––with AI that reliably identifies clinical needs and trends across your practice's patient population.

Increase claim approvals

Speed up insurance claim submissions and increase approval rates for perio, endo, and restorative treatments using AI-powered radiologic images with automated pathology annotations that are precise and accurate.

Key Features at a Glance

- AI-guided daily schedule
- Intelligent recall & marketing lists
- AI-insight driven patient database
- Clinical performance dashboard
