Network

Become a health plan of choice

Network by HealthStream® offers the industry's only network relationship management (NRM) system. Seed your database with your practitioner's data from national sources, leverage our industry-leading Primary Source Verification (PSV) tools, and continuously stream updated practitioner data to all corners of your operation.

Leverage Network by HealthStream to:

- Enhance the relationship with your network
- Create a delightful experience for your practitioners
- Simplify data management across the enterprise

Network Highlights

End-to-End Solution

- A one-stop shop solution to disentangle and manage your provider data, all the way from ensuring compliance to enhanced provider relations.

Best-in-Class Partnerships

- Leverage our integrations to send your data with one click to leading data providers and commercial Credential Verification Organizations (CVOs) within our HealthStream OneClick CVO Marketplace.

Cost-Effective

- Say goodbye to incremental costs for additional functionalities or struggles with disconnected systems.

Designed for Health Plans

- Experience first-hand the software that recognizes the unique challenges and use cases within health plans.

Key Product Features

- **Streamlined Credentialing:** Automate your primary source verification using our industry-leading tool, tailored to handle all unique health plan use cases.
- **Accelerate Time-to-Scale:** Swiftly identify and add new practitioners to your network and fill gaps in coverage, all to create a delightful member experience.
- **Compliance Made Simple:** Achieve compliance seamlessly with automated network adequacy checks and real-time directory updates.
- **Data Transformation:** Untangle the complex relationship between your products, practitioners and their location with our intuitive contract management features..
