Daniela Bianchi

Primary Teacher
Crafts, Design, Technology (CDT)
German as an Additional Language (DaZ)

"Crafts, Design, Technology classes provides opportunities for hands-on work and the development of innovative ideas, while DaZ serves as the key to communication, integration, and active participation in daily school life. Both courses complement each other by specifically fostering students' expressive abilities, self-efficacy, and individual skills. My own art and design practice, along with my passion for these fields, form the foundation of my CDT instruction. Drawing on this knowledge, I am delighted to support the students at Lakeside School in developing their creative and personal potential."
