

Safety Audits & Regulatory Support

► **Objective Area Solutions, LLC (OAS)** is a Washington, D.C.-based management consulting firm specializing in engineering, safety, operations, cybersecurity, organization performance, and other professional services for Civil Aviation Authorities and Air Navigation Service Providers. Our consultants have managed aviation projects globally at more than 100 countries.

Our dual focus on safety regulations and operational execution gives us a unique capability to help clients excel in regulatory compliance while advancing aviation innovation.

Audit Preparation

We offer comprehensive audit preparation services to ensure you are ready for your next aviation safety inspection. Our experts have supported FAA, ICAO, IATA, and other aviation safety inspections and audits around the world. Comprised of former inspectors, our audit preparation teams can expertly advise our clients on how to prepare and thrive during the audit.

Strategic Consultation

We partner with our CAA clients to confirm long-term strategic vision for global aviation expansion and to chart an integrated course to reach those objectives. We combine our support for international conventions and agreements, audit preparation, continuous improvement, and coordination with air carriers and regulatory agencies to ensure our clients achieve their national priorities.

International Conventions and Agreements

From Open Skies Agreements, the Cape Town Convention, and Airline Code-Share Programs – we help our clients quickly and effectively sequence and navigate detailed service expansion processes, achieve optimal terms for aviation financing, and partner with global aviation authorities and stakeholders.

Post-Inspection Continuous Improvement

Passing inspections are important, but it is just one step in the aviation safety journey. We help our clients to implement and sustain an aviation safety continuous improvement program. A well designed and managed continuous improvement system not only ensures continuous compliance, but it can also drive national and economic priorities by making sure your CAA is always ready to integrate the newest emerging technology and leverage the most strategic global partnerships.

Let's talk.
