MATERIAL SAFETY DATA SHEET

MaxiDex® 19-007

General description

MaxiDex® - The world's first hybrid glove
MaxiDex® is a groundbreaking innovation in hand protection, combining the best features of precision-handling gloves and disposable gloves. Designed for mechanical protection and precision handling, it offers advanced protection against liquids and unknown substances, all while being ultra-thin.

Certified according to EN ISO 374-5, MaxiDex® also offers virus protection and with its unique ViroSan™ technology, it helps preventing the proliferation of viruses on the glove surface. Ideal for a variety of tasks, it's touchscreen-compatible, washable at 40°C (up to 3x), and 100% SVHC-free.

Compliances

ATG®, herby declares, that this PPE Type is in conformity with the relevant Union harmonisation legislation: Regulation (EU) 2016/425 and the relevant harmonized standards No.: EN ISO 21420:2020 - General requirements, EN 388:2016 + A1:2018, EN ISO 374-5:2016, EN ISO 374-1:2016 + A1:2018.

For detailed applications where this product can be used please consult the ATG® website at www.atg-glovesolutions.com.

Main ingredients

Liner: Nylon

Hazardous ingredients

REACH

All ingredients used in the manufacturing and construction of this product are compliant with the EU directive for the "Regulation of chemicals and their safe use" more commonly known as REACH -- EU directive EC 1907/2006. REACH stands for "Registration, Evaluation, Authorisation and Restrictions of Chemical substances". The key aim of REACH is to provide high levels of protection to human health and the environment.

More information can be found at: https://single-market-economy.ec.europa.eu/sectors/chemica.

Precautions for use

Before usage, inspect the protective product for any defects or imperfections. If it is ripped or punctured during use dispose them immediately. Wear an appropriate size as too loose or too tight fitting products increase the risk for injuries.

Storage requirements

Store in a cool; dry place which is away from direct sunlight and/or heat. Extended exposure to direct sunlight or excessive heat will reduce shelf life and resulting in fading, discoloration and cracking. Normal anticipated shelf life is 5 years.

Disposal

After the product has been used it may be contaminated with infectious or other hazardous materials. Please dispose to local authority regulations.

Fire notes

The product will decompose at high temperatures. Extinguish using water, CO_2 spray our dry powder.

First aid

Remove contaminated PPE (Personal Protective Equipment). Skin contact: if an allergic reaction occurs seek medical advice immediately. Eye contact; rinse thoroughly with low pressure water. If any prolonged discomfort, seek medical advice immediately.
