Large Robinia Agility Course

Materials & Construction

Posts & beams: Robinia hardwood
Balance: Balance beams and log walks, with rope traverses between posts
Stepping: Stepping posts, a curved log wall and a timber stepping platform
Climbing: Low rope nets
Foundations: Posts set in the ground in concrete (about 25 kg per hole)

With a free-fall height under 1.0 m, BS EN 1176-1 allows grass or turf, or any EN 1177 impact-absorbing surface. We'll recommend the right finish for your site.

How to Use

Beams & traverses

Children choose their own route along balance beams, log walks and rope traverses that loop around the area.

Benefits:

Builds balance, coordination and confidence.

Posts & nets

Stepping posts, a curved log wall, a stepping platform and low nets break up the routes with extra challenges.

Benefits:

Develops strength, agility and cooperative play.

Inspection & Maintenance

Routine visual check weekly (daily on busy or vandal-prone sites), an operational check every 1–3 months and a main inspection once a year. Check ropes and nets for wear, fixings for tightness and timber for splits around fixings. Replace worn or damaged parts promptly with genuine spares. Morti Sport & Play offers annual inspection and maintenance for school and public sites.

Why Choose This Product

A large Robinia agility course spread across 320 m^2, with balance beams, rope traverses, stepping posts and low nets arranged in several loops. Children can take many routes at once, and with a free-fall height under 1.0 m it can go on grass.

- Many routes across a 320 m^2 area for big groups
- Free-fall height under 1.0 m, so it can go on grass
- Robinia hardwood: naturally durable, no preservatives needed
- Designed, supplied and installed by Morti Sport & Play's own teams
