REZILIENT

WHAT IS REZILIENT?

Two ways to get care.

Visit a CloudClinic:
Come into a Rezilient CloudClinic for in-person care. A trained medic is in the room with you, while your provider joins live on screen.

Together, they perform your physical exam, check vitals, run tests, and handle labs when needed.

Connect Virtually:
See your Rezilient provider from home, work, or wherever you are when you don't need in-person care.

Healthcare *without* the usual hassle.

Get in quickly.
Same-day and next-day appointments mean less waiting when you need care.

More time with your provider.
Longer appointments (up to one hour) mean more time to talk, ask questions, and get answers without feeling rushed.

The same provider.
Whether you're seen virtually or in person, your provider knows you and your history, so you don't have to start over.

Get more done in one visit.
When needed, exams, testing, and labs happen during your CloudClinic visit, so you can leave with more answers and a clearer next step.

MORE TIME WITH YOUR PROVIDER — LESS TIME WAITING

CONNECTED TO YOUR CARE

Here for *every* step.

When you need care beyond Rezilient, we can help you get there.

Healthcare can get complicated quickly. If you need a specialist, imaging, therapy, or other care outside of Rezilient, our Care Navigation team can help you find the right next step.

We help identify appropriate in-network providers, coordinate referrals and appointments, and stay connected to your care along the way. When possible, your care team can also share relevant records and consult results with your outside provider to help make your care more connected and seamless.

SAME-DAY APPOINTMENT

SPECIALTY REFERRAL

FOLLOW-UP CARE PLAN

Coordinating what comes *next.*

Your Rezilient care team can bring asynchronous specialty consults into your care without a separate appointment.

With access to 70+ specialties, our care team can gather diagnostic information, such as lab results, testing, images, or EKG readings, and connect with a board-certified specialist through an async specialty consultation.

Your care team reviews the specialist's recommendations with you and helps determine the right next step. This can save you the time, travel, and expense of an unnecessary specialist visit. If an in-person visit is needed, your care team can help coordinate what comes next.

ALL AT NO COST TO YOU.
