Description 05

Always looking for a unique experience

I'm a Web & Webflow Developer based in Argentina, with over five years of experience building and launching websites primarily for startups.
I enjoy pushing beyond my comfort zone, setting new goals, and growing through hands-on experience. With a strong interest in design, I focus on bridging development and creativity to create thoughtful, well-crafted digital experiences that are both functional and visually engaging.

Experience 06

Front-end & Webflow Developer
ElipseAgency (ea) · Contract, 2021.02 - Present · 5 years, 6 mos

I lead the development of client websites, taking ownership of projects from planning to launch and ongoing maintenance.
I primarily work with Webflow as our main platform, supported by HTML, CSS, and JavaScript to address specific technical and design challenges. I'm involved across the full lifecycle of each project and play a key role in the creative phase, helping bridge design and development to deliver well-crafted digital experiences.

Web Development Tutor
Coderhouse · Contract, 2020.08 - 2021.02 · 7 mos

I tutored the Web Development course at Coderhouse twice, supporting students with HTML, CSS, GitHub, and related topics, and assisting with questions and exercise reviews.

Photographer
Freelance, 2015.04 - Present · 10 years

I spent several years working as a freelance photographer, collaborating with brands and companies, mainly within the fashion and clothing industry on campaigns and productions. During this period, some of my portrait work was featured in PhotoVogue, part of the American fashion magazine Vogue.
