SELF CLEANING FIRE POT

Revolutionary automatic cleaning system making the heating element more autonomous, allowing you to save time in routine maintenance and providing added convenience.

FIREX 600

All Ravelli's products have a combustion chamber made from FIREX 600, a vermiculite based material developed by Gruppo Ravelli after long and extensive research.

STAINLESS STEEL HEAT EXCHANGER

A stainless steel heat exchanger means increased fire resistance and reduced wear

REMOTE CONTROL WITH DISPLAY

A practical and convenient remote control allows you to adjust temperature and power as required. Moreover, it helps to perform the stove programming laying confortably on the sofa.

ASH PAN

A functional and easily accessible ash pan collects all the burned out ash.
