

Secure Banking for Digital Assets

Built on regulation. Defined by trust.

CELSIAN | BANK

Regulation as a Competitive Advantage

One Regulated Bank. Everything You Need.

Banking License & MiCAR Authorised

Liechtenstein banking license, FMA-supervised, MiCAR authorised. The regulatory foundation everything else is built on.

Institutional-Grade Platform

Built for professional clients and high-volume operations. The execution quality and product depth of a top-tier financial institution, purpose-built for digital assets.

Asset Protection

Client assets legally segregated under banking law. Fiat deposits covered by the Liechtenstein deposit guarantee scheme.

One Platform Fully Integrated

Trading, custody, staking and commercial banking in a single regulated environment. Institutional-grade execution with deep liquidity across digital asset markets.

CELSIUS | BANK

Our Foundation

The Next Generation of Banking Infrastructure

Trading

24/7 spot trading with direct access to deep liquidity. Advanced order types, including limit, market, stop-limit and algorithmic execution, support professional trading strategies. Efficient execution, competitive pricing and transparent reporting. Top-tier trading capabilities within a regulated banking environment.

Custody

MPC-based key management designed to reduce single-point-of-failure risk. Client assets are legally segregated from the bank's own assets in line with applicable requirements. Multi-signature governance and multi-factor authentication for every transaction. Institutional-grade protection within a regulated banking environment.

Staking

Staking integrated into the custody infrastructure, with assets remaining in the regulated banking environment throughout the staking process. Curated Proof-of-Stake assets, transparent rewards and clear pricing. Reward generation through an integrated setup designed to reduce reliance on third-party platforms.

Payments & Treasury

Dedicated accounts in CHF, EUR and USD, each with its own IBAN. Payments and FX handled directly within the banking relationship. Real-time internal transfers between accounts. Treasury solutions integrated with digital asset services through one account structure.

CELSION | BANK

The Architecture

One Bank. One Platform. Integrated by Design.

Without Celsion

Trading
Execution only

Staking
Additional provider

Custody
Separated holding

Payments
External rails

Separate Banking Relationship

- Manual handoffs
- Fragmented view
- Slow treasury ops

With Celsion

Trading
Best Execution

Staking
Inside the bank

Custody
Fully segregated

Cash & Settlement
CHF • EUR • USD • FX • Treasury

- Integrated fiat & digital assets
- Full asset visibility
- One banking relationship

CELSION | BANK

Trading

Institutional digital asset trading
Within one banking relationship.

24/7 Trading

Continuous market access through resilient infrastructure built for stable and efficient execution.

Professional Trading Platform

Professional trading interface with real-time market data, advanced charting and full order lifecycle transparency. Built for professional users.

Advanced Order Types

Limit, market, stop-limit and algorithmic orders. Designed to support advanced trading strategies with transparent transaction records.

Deep Liquidity

Connectivity to a global network of liquidity providers with access to competitive pricing and professional execution workflows across all supported digital asset pairs versus fiat.

CELSION | BANK

Custody

Segregated. Protected. Yours.

Regulated & Trusted

Custody provided within a regulated banking framework under Liechtenstein banking law and applicable MiCAR permissions.

Multi-Layered Security

Private key management built on institutional-grade architecture. Distributed, governed and designed to reduce single-point-of-failure risk.

Segregated Assets

Client assets are legally separated from the bank's own assets. Transparently recorded, bankruptcy-remote, and fully compliant with applicable segregation requirements.

All-in-One Platform

Crypto and fiat custody in a single account structure. Integrated with trading and staking, reducing operational handoffs and reliance on external custody providers.

CELSION | BANK

Staking

Put your assets to work.
Without giving up control.

Integrated with Custody

Staked assets remain within the custody infrastructure throughout the staking process. Integrated setup designed to reduce reliance on external platforms.

Selected Proof-of-Stake Assets

Staking available for a carefully selected set of digital assets, chosen for liquidity, institutional suitability and risk standards.

Transparent Rewards

Generate staking rewards through a professionally managed and fully transparent process.
Clear reward structures, no hidden fees, no surprises.

Managed Unlocking

Unstaking timelines are governed by the underlying protocol. We manage the process transparently and provide visibility on expected availability.

CELSION | BANK

Commercial Banking

Multi-currency banking for settlement, liquidity and treasury flows.

Payments

CHF, EUR and USD payments with access to major payment rails. Same-day processing available for supported routes, with streamlined payment flows.

Foreign Exchange

FX between CHF, EUR and USD executed directly within the Celsion account. Integrated FX functionality without the need for separate external arrangements.

Internal Transfers

Internal transfers between Celsion accounts across supported currencies. Designed for real-time processing and T+0 internal settlement.

Treasury

Treasury solutions across short- to mid-term horizons, balancing accessibility, maturity and yield within a regulated banking framework.

CELSION | BANK

Executive Management

Experienced leadership. Clear mandate.

Dr. Markus Federspiel

Chief Executive Officer

Markus is a senior banking executive with a strong track record in building and growing financial institutions. He combines strategic thinking with a hands-on approach and is known for developing strong teams in regulated environments. Well connected across the financial industry, he brings clients and institutions together and turns relationships into business. He has experience in traditional banking and digital assets, bridging the two in a practical way.

Holger Schultes

Chief Operating Officer

Holger is an experienced banking executive with a strong background in IT and operations. He has held senior positions at several Swiss financial institutions, including Bellevue Group and Quintet Private Bank. At Celsion Bank, he serves as Chief Operating Officer and oversees the bank's operational activities and infrastructure.

Harald Siegel

Chief Financial Officer

Harald is a Swiss Certified Accountant with a background in audit at KPMG and more than a decade of experience as CFO and member of the Executive Board at ISP Group, leading financial and risk management. At Celsion Bank, he oversees Finance, Controlling and Treasury.

CELSION | BANK

Why Clients Choose Celsion

1

Banking License & MiCAR Authorised

Full banking license under Lichtenstein law and MiCAR authorisation. The strongest regulatory foundation available in Europe for digital asset banking.

2

Integrated Operating Model

Trading, custody, staking and commercial banking connected within one environment. Reducing fragmentation, coordination effort and operational friction across digital assets and fiat.

3

Built for Complexity

No retail. No exchange logic. Designed for corporates, institutions, family offices and structured entities with real requirements.

4

Operating from Liechtenstein

One of Europe's most stable and trusted financial centres. No governmental debt, AAA-rated, politically secure, with a long-standing regulatory framework built for financial institutions. A jurisdiction that adds credibility, stability and optionality.

5

Long-term Investor

Backed by a single long-term shareholder with a strategic focus on digital asset infrastructure. Aligned for sustainable development and long-term continuity.
