WAVE Missions 2027

Spring Break Location: Miami, FL

Dates: February 27-March 5th 2027

About Miami:
Miami is a city of contradictions. It is ranked as the third richest city in America and eighth in the world according to a 2018 USB study of 77 world cities, but 1 in 4 people live in poverty.

About Our Trip:
Partnering with GenSend, this mission trip will involve working alongside established and emerging church planters in the Miami area, as well as with well-established churches. Participants will have opportunities to engage in mercy and compassion projects and to conduct outreach in new communities where church plants are being established. In addition to serving the Miami community, there will be dedicated times for worship, fellowship, and teaching throughout the week. This trip offers a meaningful way to learn while making a positive impact in the city.

About GenSend:
GenSend Break allows students the chance to meet needs, change lives and join God's work on mission across North America. Students will learn new ministry skills, meet church planters and get a big picture of the need and opportunity for the gospel. Students will learn these things while serving side-by-side with the local missionaries, hearing their stories and seeing how they can make a difference. From serving at well-established ministries to responding to sudden disasters, students will have the opportunity to help broken communities experience healing across North America! By working with the local planters and missionaries, the work will continue once you leave, and the principles learned go home with you to be used in your local hometown or on your campus.
