Concrete grinding and polishing

Lifetime™ Series

Heavy-duty steel construction and long-lasting filters for years of work.

Why Lifetime

- **Built to take a beating:** Heavy-duty steel frames and canisters for stability and jobsite handling.
- **Filter stars:** HEPA filtration to keep you safe and large filter areas to maintain suction.
- **Silica protection:** External filter shaker and continuos bagging system for clean disposal too.

Job ready out of the box

Each Lifetime vacuum is available as a complete cleanup kit which includes: **a Longopac bagging supply or similar, a 25-foot hose, a wheeled floor tool with Z-bend, a bulk wand and a crevice tool.** Please see product brochure for specific details

HEPA filtration	H14	H14	Inline HEPA	Inline HEPA
Approx. weight (lbs)	220	246	500	650

Technical specifications may vary by configuration and are subject to change.

Which model is best for your application

LTS 2

Tough, dependable dust collection for small to medium jobs.

LTS 3

More airflow and filtration for bigger cleanup demands

LTS 85

Continuous-duty performance for demanding grinding operations

LTP 85

Same Industrial grinding performance as the LT 85 plus propane-powered flexibility.

Find the right model for your application

From small cleanup jobs to continuous-duty grinding, we'll help you choose the right unit.
