

AGED BARK FINES

Technical Data Sheet

PRODUCT DESCRIPTION

Aged Bark Fines is a softwood mulch that can also be used as a soil amendment. It is screened from aged bark and as a result, has a high organic matter content. It maintains a low pH relative to other mulches, which favours the growth and germination of plants when used as a soil amendment. When used as a mulch, the Aged Bark Fines enhance soil moisture retention and suppress weed growth. This product is dark brown to black in colour, with a uniform texture and a fresh aroma.

This product has been approved for use in organic agriculture by Ecocert Canada.

TYPICAL ANALYSIS

| | |
|------------------------------------|---------------------------|
| pH*: | 5.0 - 7.0 |
| EC*: | < 0.5 mS·cm ⁻¹ |
| Organic Matter Content: | 70 - 80% by weight (dry) |
| Size Gradation: | 95% ≤ 1/4", 20% ≤ 2 mm |
| Air Filled Capacity | 15 - 20% |
| Porosity | 70 - 75% |
| Max. Water Holding Capacity | 50 - 55% |

APPLICATIONS

This product can be used as a mulch for a variety of plants including trees, shrubs, and perennials. Aged Bark Fines are also suitable for use as a soil amendment for plants that favour low pH soil or when the soil requires a boost of organic matter. When used correctly, Aged Bark Fines promote increased soil organic matter, growth of beneficial soil microbes.
