

## GRO-TURF® TOP DRESS

### Technical Data Sheet

#### PRODUCT DESCRIPTION & DIRECTIONS FOR USE

Gro-Turf® is a unique blend of composted materials and inert mineral stonewool. It is high in organic matter, beneficial soil microbes, and can be applied with or without seed in a topdressing program. Gro-Turf® has excellent moisture retention due to the presence of the mineral stonewool, which promotes water holding for over seeding. Gro-Turf® has been specifically designed to attack and break down thatch, a layer of both living and dead plant material that accumulates around the base of grass plants. This helps to eliminate heavy thatch build-up, which encourages root grow-in and nutrient transfer - keeping your lawn looking healthy and green!

Although we have taken great care at removing foreign objects from leaf and yard compost to meet CQA Category AA certification, small fragments may remain from the leaf and yard waste collection process. All Gro-Bark® compost is derived from leaf and yard waste and contains no food or source-separated organic residuals.

**Product Weight:** 414 Kg/CY\*

**Directions For Use:** Apply at 1/4" depth over turf. Maximum recommended application rate is 2 kg/m<sup>2</sup>.

\*Material weight is subject to change with fluctuations in moisture content.

#### GUARANTEED MINIMUM ANALYSIS

<b>Active Ingredient*:</b>	72% Compost (Leaf and yard residues)
<b>Minimum Organic Matter:</b>	20%
<b>Maximum Moisture:</b>	65%
<b>Total Nitrogen (N):</b>	0.3%
<b>Available Phosphoric Acid (P<sub>2</sub>O<sub>5</sub>):</b>	0.1%
<b>Total Phosphoric Acid (P<sub>2</sub>O<sub>5</sub>):</b>	0.2%
<b>Soluble Potash (K<sub>2</sub>O):</b>	0.1%
<b>pH:</b>	7.5 - 8.5
<b>EC:</b>	< 2.8 mS·cm <sup>-1</sup>

\*Active ingredient percentage calculated on a weight by weight basis using the bulk density of the product.

**Safe Handling:** Store in a cool dry place. Handle material with gloves and wash your hands after handling this product.

**Precaution:** This product is not to be ingested.
