

DIVOT MIX

Technical Data Sheet

PRODUCT DESCRIPTION & DIRECTIONS FOR USE

Divot Mix is a carefully selected blend of organic compost and sand amendments used to improve golf course playing conditions around Ontario. It is light brown in colour and has an earthy aroma, indicative of its main ingredient, Gro-Bark's® premium leaf and yard compost. The leaf and yard compost provides a high organic matter and microbial content, which provides a slow release of nutrients and helps to build the population of beneficial soil microbes. Although we have taken great care at removing foreign objects from the compost to meet CQA Category AA certification, small fragments may remain from the leaf and yard waste collection process. All Gro-Bark® compost is derived from leaf and yard waste and contains no food or source-separated organic residuals. The sand amendments in Divot Mix aid to balance water retention and drainage, which optimizes seed germination and establishment.

Product Weight: 506.49 Kg/CY*

Directions For Use: Fill divot in turf with mix. Maximum application rate is 5 kg/10 m².

*Material weight is subject to change with fluctuations in moisture content.

GUARANTEED MINIMUM ANALYSIS

Active Ingredient*:	55% Compost (Leaf and yard residues)
Minimum Organic Matter:	10%
Maximum Moisture:	50%
Total Nitrogen (N):	0.2%
Available Phosphoric Acid (P₂O₅):	0.1%
Total Phosphoric Acid (P₂O₅):	0.2%
Soluble Potash (K₂O):	0.1%
pH:	8.0 - 8.9
EC:	< 2.0 mS·cm ⁻¹

*Active ingredient percentage calculated on a weight by weight basis using the bulk density of the product.

Safe Handling: Store in a cool dry place. Handle material with gloves and wash your hands after handling this product.

Precaution: This product is not to be ingested.
