

# GRO-BARK®

## GRO-MAX®

### Technical Data Sheet

#### PRODUCT DESCRIPTION & DIRECTIONS FOR USE

Gro-Max® is a well-balanced, light weight soil that has a deep earthy aroma indicative of its high organic matter content. It is a balanced blend of aged bark and compost. Although we have taken great care at removing foreign objects from the compost to meet CQA Category AA certification, small fragments may remain from the leaf and yard waste collection process. All Gro-Bark® compost is derived from leaf and yard waste and contains no food or source-separated organic residuals. Gro-Max® is designed as a planting soil or as an amendment for existing garden beds. This all-purpose soil can be used with a variety of plants including annuals, perennials, wildflowers and small shrubs. It is recommended that if using Gro-Max® in vegetable gardens (or with similar high feeders), an appropriate organic or synthetic fertilizer should be used to promote vegetable growth.

**Product Weight:** 399 Kg/CY\*

**Directions For Use:** Use as amendment by blending with native soil. Maximum recommended application rate is 2 kg/m<sup>2</sup>.

\*Material weight is subject to change with fluctuations in moisture content.

#### GUARANTEED MINIMUM ANALYSIS

<b>Active Ingredient*:</b>	60% Compost (Leaf and yard residues)
<b>Minimum Organic Matter:</b>	20%
<b>Maximum Moisture:</b>	65%
<b>Total Nitrogen (N):</b>	0.2%
<b>Available Phosphoric Acid (P<sub>2</sub>O<sub>5</sub>):</b>	0.1%
<b>Total Phosphoric Acid (P<sub>2</sub>O<sub>5</sub>):</b>	0.2%
<b>Soluble Potash (K<sub>2</sub>O):</b>	0.1%
<b>pH:</b>	6.8 - 8.0
<b>EC:</b>	< 1.6 mS·cm <sup>-1</sup>

\*Active ingredient percentage calculated on a weight by weight basis using the bulk density of the product.

**Safe Handling:** Store in a cool dry place. Handle material with gloves and wash your hands after handling this product.

**Precaution:** This product is not to be ingested.
