WHISKY & SPIRITS / BOX + BOTTLE

Protect the box. Authenticate the bottle.

INVISIBLE PHYSICAL AUTHENTICATION

A premium carton and bottle label can be imitated. TAGIT adds a concealed physical check to the packaging, bottle label, or both.

Independently verified with the TAGIT handheld detector.

PREMIUM DESIGN. TWO INDEPENDENT AUTHENTICATION OPTIONS.

PACKAGING CHECK

BOTTLE-LABEL CHECK

GIFT & LIMITED EDITIONS

Illustrative whisky packaging and bottle-label verification concepts; not finished TAGIT customer products.

AUTHENTICATE THE PACKAGING. AUTHENTICATE THE BOTTLE. OR BOTH.

Copying a carton design, bottle label or QR code does not reproduce TAGIT's concealed physical security feature.

Two places to protect. One authentication technology.

Verify the genuine presentation box or carton and the bottle carrying an original TAGIT security element independently. Choose one application or combine both for premium releases.

TWO AUTHENTICATION APPLICATIONS

01 PACKAGING AUTHENTICATION

Check the original presentation carton. Integration: (a) a concealed self-adhesive label or (b) a security element embedded during carton production, subject to compatibility testing.

AUTHENTICATES THE BOX / CARTON

02 BOTTLE AUTHENTICATION

Check the bottle itself. An invisible TAGIT security element is incorporated beneath the front or back bottle label - also for spirits sold without a presentation box.

AUTHENTICATES THE BOTTLE-LABEL ELEMENT

VALUE FOR DISTILLERIES & PACKAGING PARTNERS

DESIGN INTACT

Keep premium cartons and bottle-label artwork unchanged.

FAST CHECKS

Confirm security elements using the TAGIT handheld detector.

FLEXIBLE PROTECTION

Offer carton authentication, bottle authentication, or both.

SEE PACKAGING AUTHENTICATION IN ACTION

WATCH THE SHORT DEMONSTRATION

Watch the TAGIT handheld detector verify a concealed physical element inside packaging. Ask us about a separate bottle-label demonstration.

LET'S DISCUSS A WHISKY & SPIRITS AUTHENTICATION TRIAL

www.tagit-eas.ch | info@tagit.ch

TAGIT verification confirms the genuine TAGIT element at the location checked, whether on the carton or beneath a bottle label. It does not alone establish the origin, contents or tamper history of the liquid.
