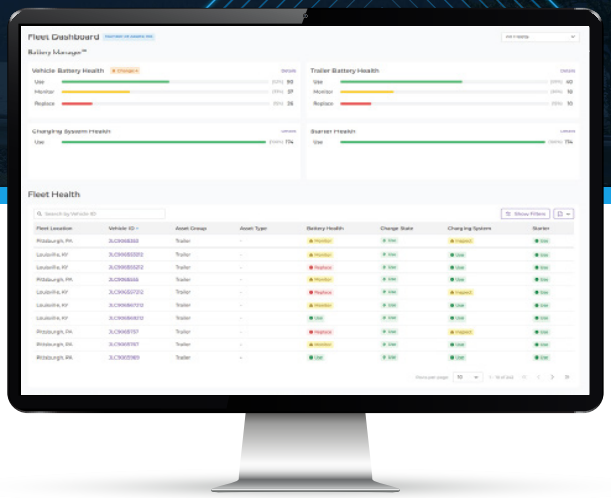
BATTERY MANAGER™



Battery Health. Without the Guesswork.

Remotely monitor battery and low-voltage system health, identify developing issues, and plan maintenance before unexpected failures disrupt fleet operations.

ABOUT CLARIOS BATTERY MANAGER

Backed by Clarios' deep expertise in battery technology, **Battery Manager** continuously monitors battery condition, usage trends, and key indicators from the charging and starting system to help fleets identify issues early, make more informed maintenance decisions, and reduce the risk of unexpected downtime.

KNOW BEFORE IT BECOMES DOWNTIME

Battery Manager helps reduce uncertainty with remote, near real-time monitoring and predictive and prescriptive insights that can flag battery, charging-system, and starter concerns, helping maintenance teams understand what action to take.

$500+ avoided roadside cost per truck per year, based on Clarios assumptions and modeling [1]

UP TO 20-30% more battery use before replacement, based on simulation results [1]

[1] *Actual results may vary.*

FEATURES + BENEFITS

REMOTE BATTERY MONITORING

Monitor battery health across your fleet without routine manual testing.

PREDICTIVE + PRESCRIPTIVE INSIGHTS

Identify battery, charging-system, and starter concerns and understand what action to take.

PROACTIVE ALERTS

Get notified of low state of charge and other battery health concerns before they lead to downtime.

BETTER MAINTENANCE PLANNING

Address battery needs during scheduled maintenance rather than after a failure.

MAXIMIZE BATTERY USE

Make replacement decisions based on battery condition, not age alone.

FLEET-WIDE VISIBILITY

View battery health across your fleet, including vehicles away from a central location.

Fleet operators don't need more data. They need actionable intelligence that helps them make better decisions. The growing adoption of Connected Services reflects the increasing value fleets place on battery intelligence and predictive insights.

- Cagatay Topcu
Vice President Clarios Connected Services

SEE IT ON YOUR TRUCKS

Start a 60-day **Battery Manager** pilot on 8-15 vehicles.

Connect with Clarios directly at CSSales@clarios.com or ask your Account Manager to get started.
