ONE PLATFORM FOR TRUST IN EVERY PERSON BEHIND YOUR BUSINESS

VERIFY THE PEOPLE — HIRE THE RIGHT ONES — EXECUTE WITH CONFIDENCE

OUR LEAD CONSULTING PRACTICE

AI Security

Your teams are already using AI. We make sure it's secure. As an **OpenAI Select Partner**, 909Cyber helps executives adopt AI with confidence: we find where AI is in use, close the gaps that leak data, and put governance in place that satisfies boards, customers, and auditors. Vendor neutral guidance from leaders who ran security at Fortune 500 companies.

OpenAI Select Partner

Data Leakage
Keep sensitive data out of prompts, models, and AI tools.

Prompt Injection
Harden AI apps and agents against manipulation.

Shadow AI
Discover and control unsanctioned AI use.

AI Governance
Policies and controls aligned to ISO 42001.

Pragmatic Security that doesn't break the bank.

What We Offer

- **AI Security** LEAD PRACTICE
  Protection against data leakage, prompt injection, and shadow AI, plus AI governance aligned to ISO 42001. Vendor neutral, and an OpenAI Select Partner.
- **vCISO & Fractional CISO:** executive security leadership sized to your business, backed by a bench of accredited CISOs, so there's no single point of failure.
- **Compliance & Assessments:** SOC 2, ISO 27001, ISO 42001, HIPAA, GDPR, CMMC and more, with controls mapped once across frameworks; plus security, vendor, and supply chain assessments, pen testing, and tabletop exercises.
- **Strategy, Engineering & Execution:** security roadmaps tied to growth and profitability, then stack consolidation, technology rationalization, and incident response setup to get it done.
- **909Shield:** patent-pending hiring-fraud detection. One Trust Score combines identity, behavioral-AI deepfake detection, and location telemetry to stop interview fraud and service desk account takeover.
- **Resourcing & 909Select:** pre-vetted cyber engineers and fractional leaders from a bench of 5,000+, plus verified freelance and full-time talent through 909Select.
- **909Protect & 909SOC+XDR:** managed detection and response across email, endpoint, network, and cloud; no vendor lock-in.
- **909Reflex, Program Essentials & Software Resale:** rapid-deployment security fundamentals, plus best-in-category tooling procured and supported through our partner network.

OUR APPROACH

1. Learn Your Business
Understand priorities, processes, and tools.

2. Determine Risk
Assess exposure against your growth and profitability goals.

3. Assess Security
Evaluate people, process, and technology.

4. Recommend Solutions
Consolidate, optimize, and reduce friction and risk.

5. Enable Execution
Hands-on delivery, not just a report.

Pricing

SERVICE	STARTING AT

Why Choose 909Cyber?

AI Security Expertise
An OpenAI Select Partner with vendor neutral guidance to help you adopt AI quickly without exposing your data.

Cost-Effective Solutions
Enterprise-level security at a fraction of the cost, freeing up budget for other business priorities.

No Single Point of Failure
Every engagement is backed by a bench of accredited CISOs, not one individual.

Expert Guidance
Our seasoned experts bring over 50 years of combined experience protecting some of the world's largest companies.

Tailored and Scalable Plans
Customized security solutions that grow with your business as threats and needs change.

Regulatory Compliance
We keep you aligned with the frameworks that matter: ISO 42001, ISO 27001, SOC 2, HIPAA, NIST CSF, GDPR, and CMMC.

What Clients Say

"The leaders of 909Cyber ran our Security and IT teams for several years through a successful acquisition. During that time, they were responsible for product and enterprise security, including compliance efforts and successfully renewing our SOC 2 for several years. Den and team also helped our go-to-market efforts: speaking engagements, partnering with sales and marketing on messaging, and lead generation."

Jayanth Gummaraju, CEO & Co-Founder; Tarun Desikan, COO & Co-Founder
