Topology 2nd edition munkres pdf

Topology (2nd Edition) by Munkres J., published in 2014, is a textbook on general and algebraic topology. It has 507 pages and is available in PDF format with interactive table of contents. The book is designed for senior undergraduate or first-year graduate-level courses in introduction to topology. The text consists of two separate sections: one on general point-set topology and the other on algebraic topology, each suitable for a one-semester course. The book provides instructors with a convenient single-text resource for bridging between general and algebraic topology courses. It covers basic core topics and offers optional independent topics and applications that can be studied in depth depending on course needs and preferences. The text is written in English and has an ASIN of B00IZ0LGCI.
