DataBee
A COMCAST COMPANY

SOLUTION BRIEF

DataBee® Continuous Controls Monitoring (CCM)

Visibility you can trust
Insights you can explain.

DataBee CCM helps security and GRC teams continuously measure control effectiveness, surface gaps, and explain what the results mean. Our AI-native platform delivers instantaneous and immediate results, with an intuitive self-service setup that enables teams to build a security controls monitoring program that works for them.

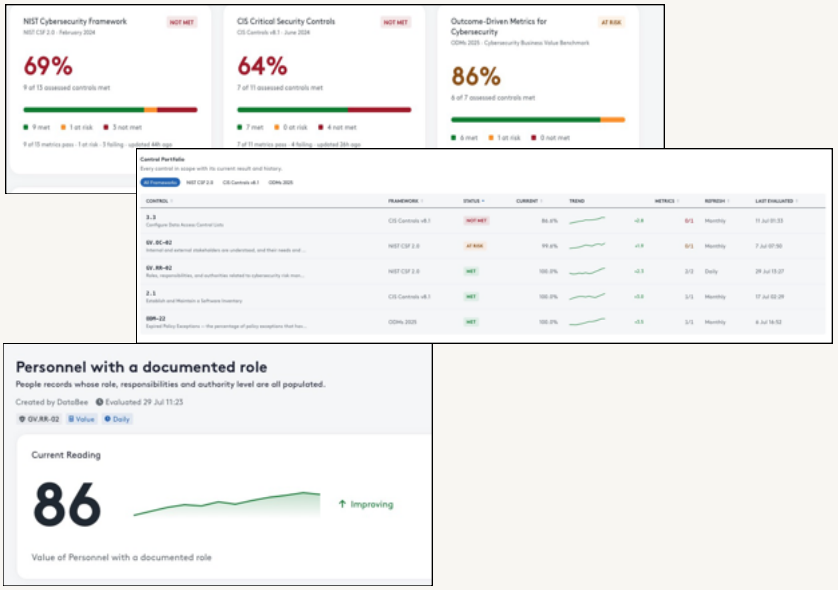
Gartner® Sample Vendor for Continuous Controls Monitoring

VALUE PROPOSITION

Periodic assessments leave blind spots between reviews. DataBee CCM continuously monitors the controls and metrics that matter, maps results across frameworks, and keeps every measurement traceable to the data behind it. Security and IT teams get faster answers, clearer accountability, and defensible reporting without a lengthy data project.

KEY OUTCOMES

- **Answer faster**
  Turn control and compliance questions into evidence-backed answers.
- **Find gaps earlier**
  See drift and breakdowns before periodic reviews or audits.
- **Scale the program**
  Monitor the controls, metrics, dashboards, and frameworks your organization prioritizes.
- **Report with confidence**
  Connect results to source data, business context, and accountable owners.



HOW IT WORKS

01 Connect

AI-assisted data connectors help teams reach the sources each control metric needs fast – leaving data where it is.

02 Measure

Continuously evaluate control effectiveness with operational data and map results to NIST CSF, CIS, PCI, custom frameworks, and more.

03 Report

Investigate gaps and trends in a self-service workspace with answers grounded in the underlying data.

04 Act

Communicate gaps to control owners and improve your overall risk posture with continually updated visibility into control effectiveness.

KEY CAPABILITES

- **Continuous control effectiveness monitoring.** Evaluate performance on an ongoing basis using operational data instead of periodic sampling.
- **Customizable AI-native platform.** Evaluate performance on an ongoing basis using operational data instead of periodic sampling.
- **Measurement flexibility.** Define the controls and metrics that matter to your program.
- **Explainable, evidence-backed insights.** Trace measurements to source systems and explore results, gaps, and trends in natural language with our built-in AI support.
- **Multi-framework reporting.** Reuse a control result across the frameworks it supports instead of re-validating the same evidence for each requirement. This includes your custom internal security policy.
- **Early drift detection.** Identify changes in control effectiveness as environments evolve so teams can respond before gaps become urgent.

WHY DATABEE

Build the program you need

Monitor the controls and metrics your organization prioritizes, add custom frameworks, and shape reporting for each stakeholder.

Get to control answers faster

Focus only on the information needed to calculate each metric and answer each control question.

Keep insights explainable

Ground every measurement and answer in supporting data so teams can understand and defend the result.

Extend value across DataBee

Use the DataBee platform to support CCM alongside other cyber risk management workflows.

USE CASES & AUDIENCE

ROLE	WHAT CCM DELIVERS
BISO / GRC Leader	Continuous, data-backed answers about control effectiveness, ready for leadership and framework reporting.
CISO / Security Risk Leader	Clearer visibility into control gaps, trends, business context, and accountability.
Control Owner / Security & IT Operations	Earlier insight into drift and the systems behind each gap, helping teams determine what needs attention first.
