

Hi Friend,

Thank you for joining the Regeneration International community! **Together, we're providing hope and healing to children who need it most.**

In the Philippines, a history of conflict, ongoing exploitation, and extreme poverty have left children vulnerable to human trafficking—both in person and online. The country is known as a “global hotspot” of Online Sexual Exploitation of Children (OSEC), and this rapidly growing industry is putting more and more kids at risk.

But we can protect children and create safer communities!

At Regeneration, we combat trafficking and abuse through protection, outreach, and prevention. **Our safe homes provide comprehensive, holistic care to child survivors as they heal.** The close proximity of the separate boys' and girls' homes allow siblings to stay near each other after being rescued.

Beyond survivor aftercare, we work in vulnerable communities to stop exploitation before it begins. **Since 2018 we've reached more than 16,000 families, teens, and children** with emergency supplies, basic needs, and awareness training.

Thank you for helping to build a future of freedom! I look forward to sharing regular updates about the children we serve and more ways you can get involved.

With gratitude,

Charisa Stauffacher
