Why Us? Quality Construction

No OSB or Particleboard Products are Used at Our Facilities.

Quality and Service have long been our highest priority here at Cricket Valley Structures. From the very first barn we built in 2005 to the ones coming off the line today, we are continually looking for ways to improve our barns without making you pay a premium price for it. Quality is why we use a Premium Grade 2"x4" for all our studs, 2"x8" top plates, 3"x4" metal truss plates for our trusses and doors, 4"x6" runners.... the list goes on and on (Please refer to the "Quality Features" section on page 26 for more details). We greatly value you as a customer and even more as a person, therefore we believe you should be treated with the best customer care in the industry and we would be happy to supply you with a "best in class" Cricket Valley Structures shed. **We will stand behind the quality workmanship of our buildings with a 6 year craftsmanship warranty on all of our structures.**

Your new Workshop, Garage or Garden Shed is shown in the pages of this brochure. You can decide what model you would like; add windows, flower boxes, shutters and even extra doors if you would prefer. If you can't find the right style that fits your need, please talk to your local sales representative and we will be delighted to see if we can design a barn specifically to fit your needs.

MCELROY
METAL

"When we received our barn it was so much more than I even imagined. You if you are waiting to find the perfect place to purchase you just did. Don't second guess it. You won't be sorry. The quality of this barn is beyond anything you could even imagine. We didn't have one issue at all. It's a dream come true. Thanks again for your skill and choice materials. It's awesome!"

B. Taylor

Wall Framing

Metal Siding

Metal sided barns are framed with 2" x 4" studs 24" o/c with 2" x 4" metal fastener nailers approximately every 32" horizontally on the outside of the studs. 2" x 8" top plate on all metal barns except garage style.

DuraTemp Siding

2" x 4" studs 16" o/c with DuraTemp siding, a real plywood based product. 2" x 8" plus 2" x 4" Double top plate.

*SPF (Spruce/Pine/Fir) lumber is graded for strength and visual appeal

Floor Specs.

4" x 6" Runner Placement

Quality That Lasts a Lifetime

Compare these quality features and see why Cricket Valley Structures is your choice for *Superior Quality* that lasts a lifetime!

3"x4" Truss plate

High Quality Standard Features:

- 4"x6" Runners: Pressure Treated & stronger than any other runners.
- 3"x4" Commercial grade truss plates: No plywood gussets!
- Aluminum Garage Door Tread Plate: Cricket Valley Exclusive!
- We only use 3/4" Treated Plywood Flooring: Lifetime warranty, real plywood!
- 2"x8" Top Plate: Compare this to a single 2"x4" top plate.

More Standard Features Include:

- 2" x 4" Treated Joists
- EPA Approved Treated Products.
- High Quality Aluminum Tread plate on all standard doors.
- Insulated Vapor Barrier on all Metal Roofs.
- Wayne Dalton® Insulated Garage Doors.

Extruded Aluminum Garage Door Tread plate

2"x8" Top Plate

**Huge
Strength
Difference!**

4"x6" runners versus 4"x4"

Specifications

- Fresh-looking, more natural appearance than other copper-based treated products. i.e. ACQ, CCA.
- Can be placed in direct contact with aluminum.
- Carries a lifetime warranty against rot, decay and termite infestation.
- Clean, odorless, non-staining and non-irritating to humans, animals and plants

The only new exterior wood preservation system that is EPA approved!

Framed floor

4"x6" Runners

Permits and Drawings

Why Metal Roofs?

- 40 Year Warranty
- Maintenance Free!
- Paint Free!
- Leak Free!
- Rust Inhibitor Edge Coat

Our roof system has been proven to withstand winds in excess of 70 mph with no damage!

*Our Metal is warm-formed to prevent cracking and chipping of paint!

Product Information

Standard in all our roofs!

- Reduces building condensation.
- Forms an effective wind and vapor barrier.
- Reduces heat loss in winter and heat gain in summer.
- Not affected by moisture and humidity.
- Bird, rodent and insect resistant.

Thermoforming

To increase corrosion protection for greater longevity, visual appeal and value, McElroy Metal now ThermoForms all Max-Rib® galvanized and galvalume metal panels with siliconized polyester coatings.

Why?

ThermoForming of metal panels reduces the risk of premature corrosion of roof and sidewall panels by significantly reducing tension-bend cracking of the paint and metallic coatings.

What is TENSION - BEND CRACKING?

At colder forming temperatures, the substrate and siliconized polyester paint coatings become brittle, and the forced bending by the rollers may crack both layers as shown. This exposure point is unprotected from oxidation (rusting) of the base metal substrate. Because Kynar 500® coatings are more flexible, tension-bend cracking is not an issue with Max-Rib® Ultra.

Where do TENSION-BEND CRACKS occur?

The THERMOFORM Process . . .

Prior to entering the roll-former, the coil sheet enters a heater that raises inner and outer temperatures to >120F. This process increases the ductility of the paint coating as well as the ductility of the galvanized or galvalume metallic coating.

Rent-To-Own

Tired of Driving Across Town to Get to Your Storage?

Why rent a storage unit when you can have your own Rent-To-Own?

Advantages of Rent-To-Own!

1. If you can't purchase a shed outright, We will be more than happy to assist you with a shed that can be obtained on a per Month Plan!
2. No Credit Required
3. Only 10% / Or 2 Payments Down!
4. Have Your Own personalized Custom Shed!
5. Conveniently Placed in your Backyard instead of at a storage unit!
6. You obtain Ownership After Finishing the agreed number of Payments!
7. NO early payoff penalty!

If you choose our Rent-to-Own plan, you do not acquire any ownership rights unless you pay the full amount required for ownership or exercise an early purchase option. You may cancel the rental contract at any time simply by calling us and requesting that we pick up the building at no further cost to you. Or You may also purchase the building at any point by simply paying 60% of the remaining total balance, of the Payments on the lease!

RTO is on a 60%-40% Plan: 60% of your payment is buying the Shed, while 40% is for the Rental of the Shed.

Rent-To-Own is made available by:

All On-Site Builds are not available for Rent To Own

P.S. If you are wanting to start your own RTO Company, and/or need assistance in starting/managing it, please contact at CountryClassicRentals.com or call 937-483-4588 — They will help you from Start to finish!

Delivery and Setup

- Reduces yard damage.
- Enables delivery in moist areas.
- Easily maneuvers through tight spots.

Site Preparation Recommendation

WE RECOMMEND -

Level Ground - Base should be 12" larger than building on all four sides. Remove 3 - 4" of sod and fill back in with No. 57 limestone or gravel, making sure that the entire area of stone is level. Or, put 4-5" of gravel on top of sod, then make sure it is level and compacted.

Sloped Ground - Remove 4-5" of sod on high end and build up low end using 4"x4"s fastened together on top of each other creating a box frame, fill frame with No. 57 limestone. Level and compact stone. If barn is NOT built On-Site, pad must be accessible for equipment to move shed into place.

Please only use only limestone gravel! No smaller than crusher run and no bigger than #5.

We level and block to a maximum height of 12". There is a charge of \$10 per block used over 12". This charge is for the additional time and labor to install it. Customer supplied blocks are still subject to this charge. Max blocking height is left to the drivers discretion. Buildings placed on block are more susceptible to settling unevenly. Please consider using a gravel pad for a solid foundation.

Customer is Responsible for All Anchoring, Zoning, and Permits.

We appreciate that you chose to look at our quality-built buildings.

CHOICES

We all have many choices to make in our journey through life. From birth till death we travel between the eternities. May the choices we make help us to find calmness in our soul, peace in our heart, a meaningful future, and a safe eternity...*For God so loved the world, that he gave his only begotten Son, that whosoever believeth in him should not perish, but have everlasting life.* JOHN 3:16
