INSIDE THIS REPORT

What You'll Learn in the Next 10 Minutes

A practical, no-fluff guide to building a modern PM tech stack — from core infrastructure to AI-assisted workflows.

HOW TO USE THIS GUIDE

Each section builds on the last. Start with the stack overview, locate where your team sits on the maturity model, then use the roadmap to prioritise your next 90 days.

01	The Modern PM Tech Stack	7 operational layers
02	PMS vs. CRM vs. AI Layer	Platform comparison
03	Where Teams Lose Efficiency	The hidden cost gaps
04	AI Agents in Property Management	Practical use cases
05	Operations Maturity Framework	Where do you stand?
06	Building the Right Tech Stack	Implementation roadmap

KEY FINDING

Most PM teams are operating at Level 2 on a 5-point maturity scale.

Moving from Level 2 to Level 4 is where the biggest operational gains happen — and where CRM + AI integration becomes the critical lever.

THE MODERN PM TECH STACK

Seven Layers. One Connected Operation.

Modern PM operations run on interconnected technology layers. Each layer has a distinct role — and each creates risk when missing, disconnected, or underused.

PRIORITY RULE

Always start with a solid Core PMS. Everything else plugs into it. If your PMS is outdated or under-configured, adding tools creates more problems — not fewer. **Foundation first.**

PLATFORM EXAMPLES BY LAYER

Core PMS: Yardi, AppFolio, Rent Manager, Entrata
CRM: LeadSimple, Funnel, Knock, Zoho CRM
AI Agents: EliseAI, Zoho AI, Custom builds
Maintenance: HappyCo, Property Meld, SightPlan
Analytics: Radix, Engrain, RealPage Analytics

INNOVATION LAYER
AI Agents & Workflow Automation 07
Lead qualification · Follow-ups · Reporting · Coordination

INTELLIGENCE LAYER
Reporting & Analytics 06
KPIs · Occupancy · Leasing funnels · Team performance

OPERATIONS LAYER
CRM & Leasing Pipeline 05
Lead tracking · Pipeline management · Conversion optimisation

ENGAGEMENT LAYER
Communication & Resident Engagement 04
Email · SMS · Portal · Community · Maintenance comms

OPERATIONS LAYER
Maintenance & Work Orders 03
Work orders · Preventive scheduling · Vendor coordination

FOUNDATION
Core PMS 02
Accounting · Leasing · Maintenance logs · Reporting base

CONNECTIVE TISSUE
Integrations & APIs 01
The layer that makes everything work together — or fall apart

Stack Layer Quick Reference — Priority & Investment Guide

LAYER	KEY PLATFORMS	PRIMARY FUNCTION	PRIORITY
Core PMS	Yardi, AppFolio, Entrata, Rent Manager	Accounting, leasing, maintenance, reporting	Essential
CRM & Leasing	LeadSimple, Funnel, Knock, Zoho CRM	Lead pipeline, follow-up workflows, conversion	Critical
AI Agents	EliseAI, Zoho AI, Custom agents	Lead qualification, scheduling, auto follow-up	High ROI
Communication	Zego, ActiveBuilding, SMS tools	Resident portal, community, maintenance comms	High
Maintenance Ops	HappyCo, Property Meld, SightPlan	Work orders, preventive maintenance scheduling	Medium
Reporting & BI	Radix, Engrain, RealPage Analytics	KPI dashboards, occupancy benchmarking	Medium
Integrations & APIs	Zapier, Zoho Flow, Custom API	Data sync, workflow triggers, cross-platform automation	Essential

THE INTEGRATION RULE

Before adding any new tool, ask: Does it integrate with your Core PMS via real-time API — not just file export? Who maintains the integration when either platform updates? Payment data, work orders, and leasing leads should sync automatically — never manually.

THE UNDER-UTILISATION PROBLEM

Most teams use less than 50% of their PMS features.

Before buying new software, audit what you already have. Most of the ROI you're looking for is already paid for — just not switched on.

PLATFORM COMPARISON

PMS vs. CRM vs. AI Layer

These three systems serve entirely different purposes. The mistake most operators make is expecting one to do the job of all three.

THE CORE CONFUSION

Property managers assume their PMS handles prospect relationships. It doesn't. PMS systems are built for existing residents — not prospects. That is exactly where CRM fills the gap. AI then sits on top of both, automating the repetitive work between them.

CORE SYSTEM

Property Management System

Yardi · AppFolio · Rent Manager · Entrata

WHAT IT DOES

- ✓ Lease management & renewals
- ✓ Accounting & rent collection
- ✓ Maintenance work orders
- ✓ Resident records & documents
- ✓ Financial reporting

WHERE IT FALLS SHORT

- ✗ Prospect relationship tracking
- ✗ Automated follow-up sequences
- ✗ Leasing pipeline visibility
- ✗ Communication automation

OPERATIONS LAYER

Customer Relationship Manager

LeadSimple · Funnel · Knock · Zoho CRM

WHAT IT DOES

- ✓ Prospect pipeline management
- ✓ Automated follow-up sequences
- ✓ Lead source tracking & attribution
- ✓ Leasing team task management
- ✓ Conversion rate analytics

WHERE IT FALLS SHORT

- ✗ Accounting & financial records
- ✗ Maintenance management
- ✗ 24/7 autonomous response
- ✗ Real-time AI analysis

INNOVATION LAYER

AI Agents

EliseAI · Zoho AI · Custom agents

WHAT IT DOES

- ✓ 24/7 lead response & qualification
- ✓ Automated tour scheduling
- ✓ Follow-up & nurture sequences
- ✓ Data entry & CRM updates
- ✓ Reporting & anomaly alerts

WHERE IT FALLS SHORT

- ✗ Complex judgment decisions
- ✗ High-touch relationship building
- ✗ Needs clean data to work well
- ✗ Requires proper system setup

HOW THEY WORK TOGETHER

PMS
Manages your existing residents & operational records

→

CRM
Manages your prospects & converts them into residents

→

AI Agent
Automates the repetitive work between both, 24/7

THE HIDDEN EFFICIENCY GAPS

Where Teams Lose 10–15 Hours a Week

Most efficiency loss in property management is not caused by bad tools — it is caused by gaps *between* tools. When data does not flow automatically, people fill the gap manually.

Estimated Weekly Time Lost Per Property

4h	Manual follow-up & communication
3h	Fragmented reporting & data entry
2.5h	Cross-system workflow handoffs
2h	Maintenance status tracking
1.5h	Lead qualification & response
Total estimated loss	**13+ hrs/week**

Disconnected Communication

Email, text, phone, and portal messages live in separate systems. No single view of resident or prospect history.

FIX: UNIFIED CRM INBOX

Manual Follow-Ups

Leasing agents manually track who to call, email, and text each day. Leads go cold when agents are busy or unavailable.

FIX: AUTOMATED NURTURE SEQUENCES

Fragmented Reporting

Leasing data lives in PMS, communication data in email, occupancy data in spreadsheets. No single source of truth.

FIX: INTEGRATED ANALYTICS DASHBOARD

Workflow Handoff Issues

Tasks fall through when moving between leasing, maintenance, and management teams. No automated handoff triggers.

FIX: AUTOMATED TASK ROUTING

Lack of Pipeline Visibility

Managers cannot see where prospects are in the leasing funnel without manual check-ins. Forecast accuracy is low.

FIX: CRM PIPELINE VIEWS

Slow Lead Response

Prospects who do not hear back within 5 minutes are 10x less likely to convert. Most teams respond in hours, not minutes.

FIX: AI-POWERED INSTANT RESPONSE

AI IN PROPERTY MANAGEMENT

AI Agents That Replace Repetitive Work

AI agents do not replace your team — they handle the high-volume, repetitive tasks that drain leasing agents and property managers. That frees your team for high-value work that requires human judgment.

THE ROI EQUATION

A single AI agent handling lead qualification, tour scheduling, and follow-ups can save **15–20 hours per agent per week** — at a fraction of the cost of an additional hire.

AI IMPACT METRICS

5 min
Average AI response time vs. 4+ hrs human

24/7
Lead coverage without additional staffing cost

30%
Avg increase in qualified tour conversion

80%
Routine inquiries resolved without human intervention

Lead Qualification

AI instantly responds to inbound leads, asks qualifying questions, and scores prospects — routing hot leads to agents and nurturing the rest automatically.

TIME SAVED: 4 HRS/WEEK

Tour Scheduling

AI handles the scheduling back-and-forth, syncing with agent calendars and sending reminders — eliminating the #1 manual task in leasing operations.

TIME SAVED: 3 HRS/WEEK

Follow-Up Automation

Multi-step follow-up sequences run automatically — personalised by prospect behaviour — so no lead goes cold regardless of team bandwidth.

TIME SAVED: 5 HRS/WEEK

Maintenance Coordination

AI triages maintenance requests, routes to the right vendor or technician, and sends status updates to residents — without property manager involvement.

TIME SAVED: 2.5 HRS/WEEK

Reporting Automation

Weekly occupancy reports, leasing funnel summaries, and KPI dashboards generated and delivered automatically — no manual data pulls required.

TIME SAVED: 2 HRS/WEEK

Resident Communication

AI handles common resident inquiries (rent payments, lease questions, amenity bookings) 24/7, escalating only complex cases to human staff.

TIME SAVED: 3 HRS/WEEK

OPERATIONS MATURITY FRAMEWORK

Where Does Your Team Stand?

Most PM teams sit between Level 2 and Level 3. Moving from Level 3 to Level 4 is where the biggest efficiency gains happen — and where CRM + AI integration becomes the critical lever.

Where most teams are today

Level 2–3

Using PMS basics with some leasing tools but still relying heavily on manual processes, spreadsheets, and disconnected communication. CRM and AI layers are absent or underused.

01
Manual Workflows

Spreadsheets, paper-based, no integrated software. High labour hours per unit.

STARTING POINT

02
Basic PMS Usage

PMS for accounting and leases. Maintenance logged. Limited automation.

MOST COMMON

03
CRM-Driven Ops

CRM in place, leasing pipeline visible, structured follow-up, PMS + CRM data sync.

TARGET STATE

04
AI-Assisted Workflows

AI agents handle lead response, scheduling, follow-ups. Automation runs 24/7 without manager intervention.

HIGH PERFORMANCE

05
Fully Connected

All systems integrated. AI-driven decisions, predictive analytics, zero data silos.

BEST-IN-CLASS

2–3
Where most PM teams operate today

→

3–4
Where we move clients in 4–6 weeks

→

5
The fully connected operational ecosystem

IMPLEMENTATION ROADMAP

Build It Right. Phase by Phase.

A phased approach reduces disruption and ensures each layer is properly set up before the next is added. Teams that try to implement everything at once see lower adoption and higher failure rates.

THE #1 MISTAKE TEAMS MAKE

Adding new tools on top of a broken PMS setup. Most properties use less than 50% of their PMS features — fix the foundation before adding layers.

Rule: If you are still exporting CSVs to track leasing performance, you are not ready for AI — you need a CRM first.

HOW MAV CONSULTING GROUP DOES IT

We implement what takes companies months — in 4 to 6 weeks.

Full CRM setup, AI agent deployment, PMS integrations, and automation workflows — delivered as a connected, live system your team can use from day one.

Schedule a Free Tech Stack Audit & Strategy Call →

01

PMS Optimisation

Audit your current PMS setup. Enable all reporting features. Clean your data. Build proper workflows for leasing and maintenance.

- → Full PMS feature audit
- → Data cleaning & standardisation
- → Team training & workflows

02

CRM Integration

Add a CRM layer connected to your PMS. Build leasing pipeline stages. Set up follow-up sequences and lead source tracking.

- → CRM selection & setup
- → PMS ↔ CRM integration
- → Pipeline & follow-up workflows

03

AI Agent Deployment

Layer in AI agents for lead qualification, tour scheduling, and follow-up automation. Connect to both PMS and CRM.

- → AI agent configuration
- → Leasing automation workflows
- → Response time optimisation

04

Full Ecosystem

Add advanced analytics, smart building tools, and cross-platform reporting. All systems talking in real time.

- → Analytics & BI dashboards
- → Smart building integration
- → Full data unification

ROI Priority Guide — Where to Invest First

Ranked by operational impact

#	INVESTMENT	IMPACT	ROI LEVEL
1	**CRM Layer**	Leasing conversion improvement of 20–35%. Fastest ROI after PMS setup.	Highest
2	**AI Lead Response**	Immediate response coverage reduces lead attrition by 30–40%.	Highest
3	**Automated Follow-Ups**	Prevents lead loss from agent bandwidth gaps. 5–10% conversion lift.	Strong
4	**Maintenance Automation**	Reduces 2–3 hrs/week per manager. Improves resident satisfaction scores.	Strong
5	**BI & Analytics**	Better decisions, faster — but only valuable if underlying data is clean.	Solid
6	**Smart Building Tech**	Resident convenience and energy savings. Lower priority until foundation is solid.	Solid

MAV CONSULTING GROUP

YOUR CRM & AI OPERATIONS PARTNER

Ready to Build a Connected Tech Stack?

We help property management teams implement CRM systems, AI agents, and workflow automation that actually work — fully integrated with your existing PMS and built for your team's workflows.

We implement what takes companies months — in 4 to 6 weeks.

Full CRM setup, AI agents, PMS integrations, and automation workflows — delivered as a live, connected system your team can use from day one.

Schedule a Free Tech Stack Audit & Strategy Call →

WHAT WE DO

- ✓ CRM implementation & customisation
- ✓ AI agent design & deployment
- ✓ PMS + CRM integration architecture
- ✓ Workflow automation strategy
- ✓ Operations efficiency consulting
