Weights are a percentage of the portfolio's total value, based on the fund administrator's valuation as at 16 November 2026. Cash includes uninvested cash and income earned but not yet paid out. Figures may not add up exactly because of rounding.

The value of investments and any income from them can go down as well as up, and you may get back less than you invested. This document shows the portfolio's holdings on the date stated. It is not a recommendation to buy or sell any investment.
