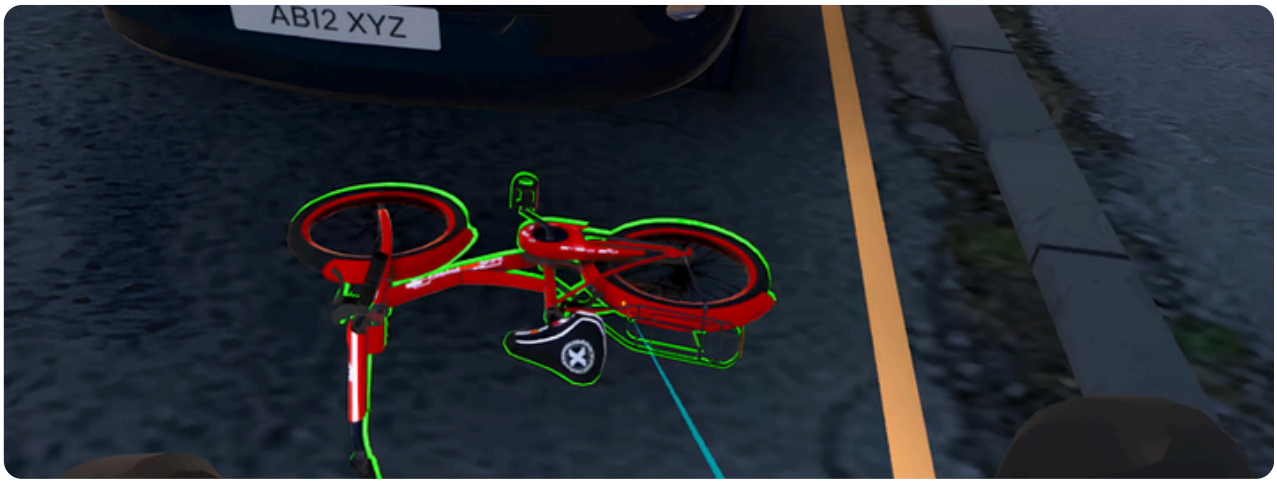
- Certificate

Experience Overview

What's included in VR Risk Acknowledgement (Delivery Safety)



Risk Acknowledgement - Delivery Safety places the user on a dimly lit street next to a parked delivery van at the start of their shift. The goal is to deliver a single parcel safely by spotting and logging every hazard around the van, inside the cargo area and along the route to the recipient's door.

Hazards are randomised on each run and include broken glass, spilled liquid, uneven pavement, an open manhole, passing cars, an unsecured dog, children playing near the van, open doors, poor parcel storage and heavy lifts. At the end the user sees what each missed hazard could have led to, receives a final score and is invited to try again.

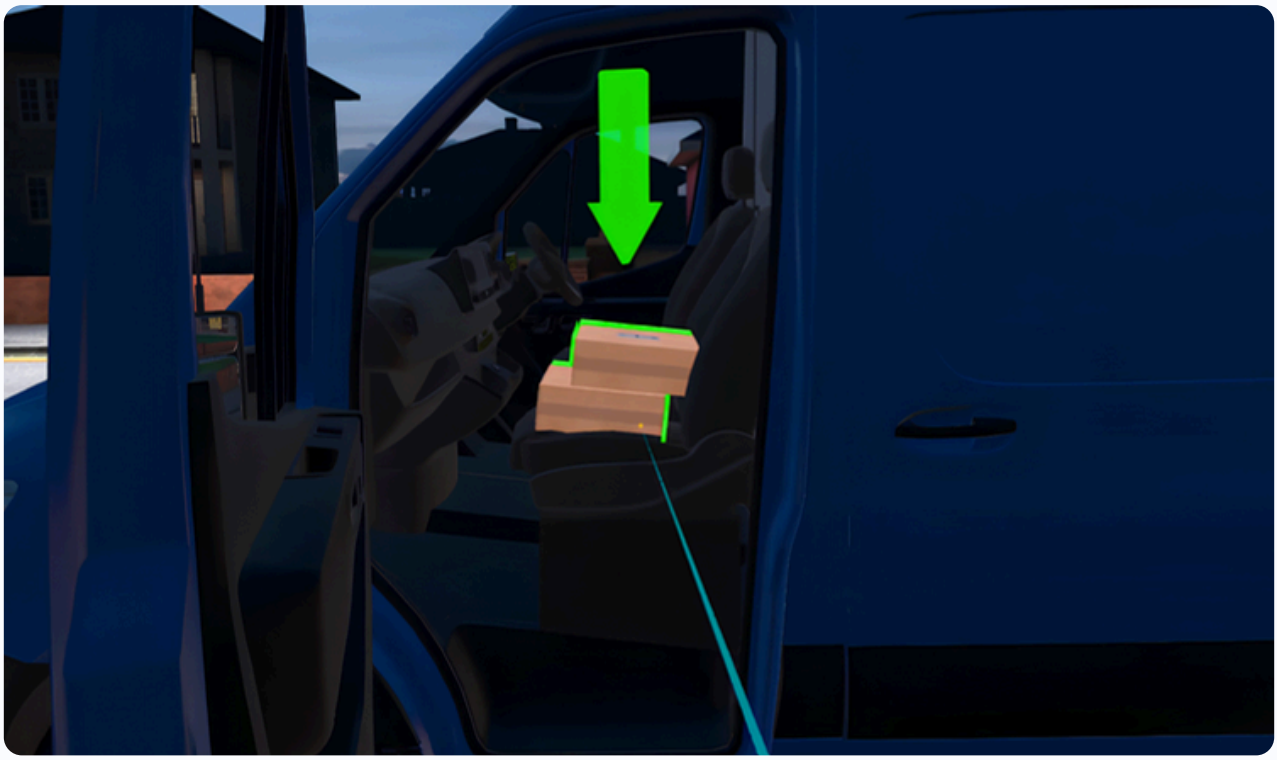
User Control

Empowering users with hands-on precision in every simulation.

Module Walkthrough

In the Learning Mode you'll be guided through the following steps. In the Training and Exam modes you'll be on your own completing the task. To exit the task press the Menu button.



1. Welcome to the Risk acknowledgement for delivery drivers VR Training. Select the mode. Point the controller at the Start Training button and press the trigger.

2. Your shift is just starting, and you have a long route ahead. Your next stop is parcel B562 for 42 Green Street. Your goal is to complete this delivery safely.

3. Take a moment to get used to the controls. Turn your head to look around.

4. Use the left joystick to move forward and backwards.

5. Use the right joystick to turn left and right, or twist your body.

6. Look around and eliminate all risks around your van and on the street. Point the controller at the risk and press the trigger to do this.

7. When you spot a risk, you must log it. To log a risk: look at it, aim the pointer and press the trigger button on your controller.

8. Hazards are randomised, so not every hazard listed below appears in each run.

9. Broken glass: point at the broken glass near the van's wheel and press the trigger. The glass will be removed.

10. Spilled liquid: point at the spill on the pavement and press the trigger to log it, then walk around the spot.

11. Uneven pavement: point at the potholes or uneven surface and press the trigger to log them, then step over carefully.

12. Damaged packaging: point at the poorly packed parcel in the back of the van and press the trigger. The parcel will be repackaged.

13. Unsecured dog: point at the area where the dog is and press the trigger to log it. Then choose how to proceed: call the recipient to secure the dog, leave the parcel at the gate, or mark the delivery as unsafe and return the parcel.

14. Boxes left unattended: point at the parcels lying next to the van and press the trigger. They will be moved inside the van.

15. Unorganised stacking: point at the loose boxes of fragile items inside the van and press the trigger. The boxes will be stacked and secured.

16. Parking on the red line: point at the red line marking and press the trigger. The van will be re-parked.

17. Children's bicycle: point at the bicycle in front of the van and press the trigger. It will be moved next to the fence.

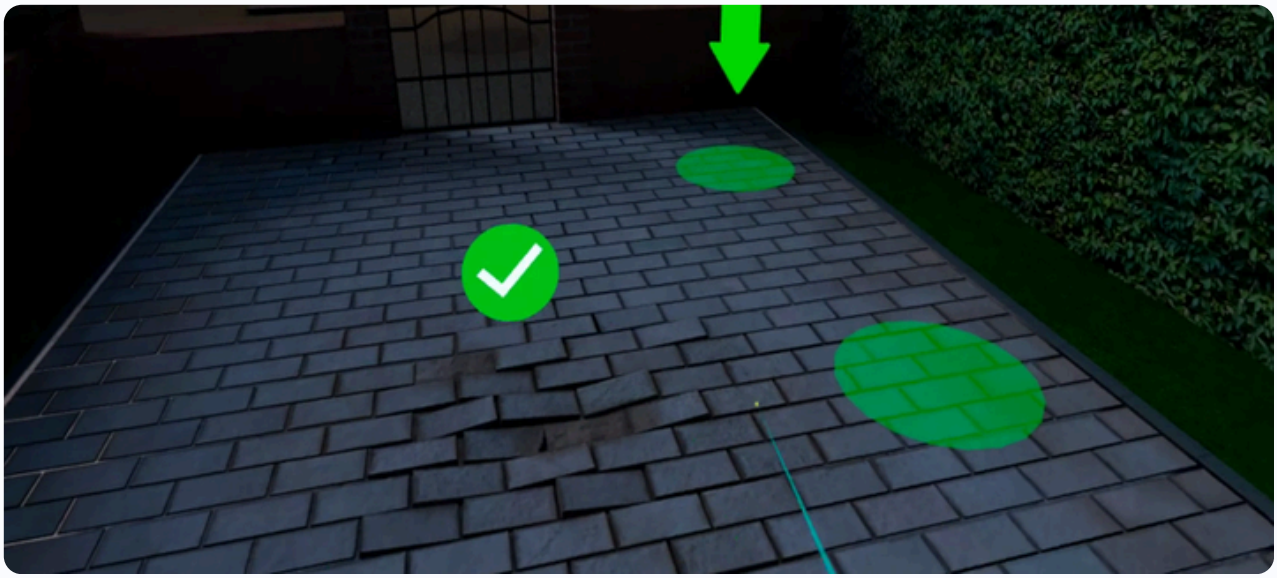
18. Driver's door open: point at the open driver's door and press the trigger to close it.

19. Rear doors not locked: point at the rear doors of the van and press the trigger to close them.

20. Children playing: point at the group of children and press the trigger to ask them to move away from the van.

21. Open manhole: point at the open manhole on the pavement and press the trigger to log it, then walk around it.

22. Passing cars: before crossing the road, look left and right and cross only when no car is coming.



23. Heavy parcel: point at the heavy parcel on the trolley and press the trigger, then select Place on cart to move the parcel with the trolley instead of lifting it alone.

24. When you have checked everything, point at the gate or the button above it and press the trigger to complete the delivery.

25. For each missed hazard you will see what it could have led to. Your final score is 100 minus 10 points for every missed hazard.

26. Congratulations! You have successfully completed Risk acknowledgement for delivery drivers VR Training.

27. Remember: your goal is not just to complete the route, but to complete it safely. Every delivery is an opportunity to protect yourself, your team, your customers, and their parcels. You can replay this stop and apply what you have learned.

28. The task is completed.

29. To exit the task press the Menu button.

VR Trainee Certificate

Employees will receive a VR Trainee Certificate upon successfully completing a training module.

NEXT WORLD

CERTIFICATE

of COMPLETION

This certifies that

DANIEL WILLIAMS

has successfully completed the Next World virtual reality training titled:
