What you get with Microsoft 365 Business Premium

€20.01 per user per month, plus VAT · billed monthly · one-year commitment

Five situations: what happens with Standard and with Premium

Situation	Business Standard	Business Premium
An employee loses their laptop	The data on it can't be wiped remotely.	The disk is encrypted, and we wipe the data remotely. Included: Microsoft Intune Plan 1
Someone steals an employee's sign-in details	The attacker signs in from their own computer.	The account won't open on an unknown device, even with the right password and code. Included: Microsoft Entra ID P1
An employee gets a dangerous email	The spam and virus filter checks the email, but not the link when it's clicked.	Links are checked when clicked, and attachments are tested before they reach the employee. Included: Microsoft Defender for Office 365 Plan 1
A computer is attacked	Windows antivirus stops known viruses, but the alerts stay on the computer.	The attack is recognized by what it does and stopped, even if the program is unknown. Included: Microsoft Defender for Business
A confidential document ends up in the wrong place	Anyone who gets it can open it.	Only your employees can open it, wherever it ends up. Included: Microsoft Purview
Price per user per month, plus VAT	**€12.74**	**€20.01**

Move from Standard any time during the year: accounts, emails and files stay as they are.

Choose Premium if you tick at least one box:

- ☐ you work with confidential data
- ☐ your employees also work from home
- ☐ clients or NIS2 set security requirements for you

An unconfigured license protects nothing. We do the setup.

Once, at the start. On every computer we set up email and device protection, disk encryption, OneDrive and updates, then the security rules Microsoft recommends, through Intune (Security Baselines, Attack Surface Reduction). That's how we align your computers with ISO/IEC 27001 and NIS2 requirements. Setup is a one-time cost.

Together with you. Rules that don't change how you work, we switch on straight away; the rest we agree on with you.

Then, month after month. If we also run your IT, we keep the rules up to date, check that every computer follows them, and 24/7 SOC monitoring watches the alerts.

Want to see what Premium would change for you?

Free 45-minute assessment, online. Afterwards you get our offer in writing.
