PortfolioDAM

PORTFOLIO SYSTEM REQUIREMENTS

CURRENT VERSION 4.2

- Portfolio Server: 4.2
- Portfolio Media Engine: 4.2
- Portfolio Web Client: 4.2
- Portfolio Desktop Client: 4.2

Portfolio Release Notes are here

PORTFOLIO AND PORTFOLIO MEDIA ENGINES

- An Internet connection is required for the activation and use of Portfolio.
  Please see Activating Portfolio for more information.
- Compatible operating environments include Windows® Server 2025, 2022, 2019, or 2016 as well as macOS™ platform configurations. Reach out to a Sales Representative for tailored deployment guidance. Please note: Deployment of Portfolio Server or Media Engine services on Apple Silicon hardware architectures is unsupported.
- Intel® Xeon® processor infrastructure containing 8 cores minimum (higher core counts optimize catalog indexing speeds).
- 16GB system RAM required up to 64GB depending on number of assets and concurrent users. Contact support@portfoliodam.com for more information and especially if looking to catalog video.
- Network connection speeds of 100 Mbit/s or greater connecting host servers to stored media repositories (1000 Mbit/s recommended).
- Microsoft® .NET Framework versions 3.5 and 4.5 (applicable to Windows Server environments).*
- **Adobe® DNG Converter** installation needed for processing camera Raw assets into DNG files.

* Please note: .NET Framework components must be provisioned prior to running installer packages. Windows Server typically includes .NET Framework 4.5 in base builds.

PORTFOLIO SERVER ADMIN INTERFACE

Hardware and system specifications for workstation endpoints executing remote administrative tasks.

- Display output configuration supporting 1280×1024 pixel resolution or higher.
- Minimum 10 Mbit/s network link (100 Mbit/s throughput recommended).
- Apple Safari® on macOS, or Google Chrome™ or updated builds of Mozilla Firefox®, across supported operating systems.

PORTFOLIO WEB CLIENT

Browser-accessible portal providing interactive access to underlying catalog structures via modern internet standards.

- 3 GB available RAM allocated.
- Screen display capability of 1280×1024 resolution minimum.
- 10 Mbit/s network throughput minimum (100 Mbit/s suggested).
- Apple Safari® on macOS, or Google Chrome™ or updated builds of Mozilla Firefox®, across supported operating systems.

PORTFOLIO DESKTOP CLIENT

Standalone desktop utility supporting native drag-and-drop file interactions.

- 64-bit releases of Windows 10 or 11; and macOS. Please note: Execution on Apple Silicon devices utilizes Rosetta 2 translation layers.
- 8 GB system RAM.
- 1280×1024 or higher screen resolution.
- Network access speeds of 10 Mbit/s or faster (100 Mbit/s strongly recommended).

PORTFOLIO NETPUBLISH PORTALS

Supported browser engines for accessing NetPublish site deployments.

- Apple Safari® on macOS, or Google Chrome™ or updated builds of Mozilla Firefox®, across supported operating systems.
