

IT'S NOT JUST DATA. IT'S CUI.

CUI creates obligations across your business

Where CUI is stored, processed or transmitted, the responsibility to protect it follows.

DFARS	NIST SP 800–171	SPRS	CMMC
Contractual responsibility	Security requirements	Assessment record	Assessment & Verification

avatara

Different requirements.
One underlying responsibility: protect CUI.

PROTECTING CUI TOUCHES YOUR ENTIRE OPERATING ENVIRONMENT.

STORE

Where CUI lives, including all internal systems and cloud environments that process it.

ACCESS

Who can reach it, how identity is verified, and how permissions are enforced.

MOVE

How CUI is transmitted, shared and exchanged — internally and with external entities.

PROVE

Can you defend your score with evidence? SSP, SPRS, policies, assessments and supporting evidence.

PROTECTING CUI IS ONLY HALF THE JOB.

YOU NEED TO PROVE IT.

SECURE THE ENVIRONMENT
Access + MFA
Encryption + boundary protection
Monitoring + configuration + vulnerability management

DEFEND THE RECORD
SSP + policies
SPRS + POA&M
Incident response + review-ready evidence

THE CONSEQUENCES ARE REAL

$507K	$1.25M	$2M+
LOGZONE	Penn State	Honeywell Aerospace

False cybersecurity representations — including unsupported SPRS scores — can create significant enforcement exposure.

Settlements resolved allegations; there was no determination of liability.

Avatara Changes The Starting Point

Protect the environment. Make the evidence readily available. Know exactly what you own.

THE ENVIRONMENT
FedRAMP Moderate Equivalent enterprise and CUI enclave options with security controls built in.

THE EVIDENCE
SSP, policies, POA&M and assessment evidence built from your actual environment — not a template.

THE RESPONSIBILITY SPLIT
Objective-by-objective clarity on what Avatara satisfies, what is shared and what remains yours.

DAY 1	30 DAYS	60 DAYS	110/110
80% CMMC L2 objectives inherited	Workspace live in as little as 30 days	Assessment-ready in as little as 60 days	AVMAC CMMC L2 result No POA&M

CAN YOU ANSWER THESE QUESTIONS TODAY?

- Do you know exactly where your CUI lives and who has access to it?
- Can your internal teams, MSPs, consultants and technology providers readily produce the evidence you need, including evidence supporting any claimed FedRAMP Moderate equivalency?
- Could you defend your current SPRS score with that evidence today?

A fully managed information system designed for regulated environments.
COMPLIANT BY DESIGN. INHERITED FROM DAY 1.
