Job Description– Director/Sr. Director (Cancer Biology)

Quarry Thera

Quarry Thera is a New Haven CT based biotechnology company focused on the development of novel induced proximity approaches to address clinical unmet need across therapeutic areas. Quarry was co-founded by Yale Professor Craig Crews and ex-Pfizer leader Mikael Dolsten, and has a leadership team with deep expertise in molecular glue and bifunctional small molecule drugs, platform innovation, and company building. Quarry is funded by top-tier venture firms.

Position Summary

As a Director/Sr. Director at Quarry Thera, you will be expected to have a strong foundation in cancer biology, including first-hand knowledge of relevant signaling pathways and familiarity with the treatment landscape in large tumor indications. You will be responsible for spearheading the advancement of small molecule induced proximity drug discovery programs from early discovery to IND. You will also contribute to identifying opportunities for novel induced proximity approaches with therapeutic applications in cancer. You will be expected to be an intellectual contributor at the level of both program leadership and portfolio buildout.

Qualifications

- PhD in life sciences and 15+ years of experience in biopharma (OR BS/MS and 20+ years of experience)
- Strategic understanding of therapeutic landscape in large tumor indications, including pros and cons of different modalities in play
- Familiarity with cutting edge oncology drug discovery literature, with a commitment to deep knowledge in project-specific biology, from target validation to clinical data.
- Experience in small molecule drug discovery, preferably in early-stage biotech
- Experience leading program biology for small molecule induced proximity therapeutics is preferred.
- Experience managing direct reports and driving projects from hit identification through Development Candidate nomination (IND preferred)
- Ability to proactively identify, evaluate, and manage external vendors of assay services.
- Experience designing in vivo studies

- Excellent interpersonal, communication, organizational, teamwork, and planning skills to accomplish multiple parallel tasks and meet project timelines.
- Authorization to work in the United States on a fulltime basis for any employer

Compensation

Quarry offers a competitive compensation package including equity awards and annual bonus. For this position, the annual base salary range is $200,000-$300,000. Our comprehensive benefits program includes medical, dental, vision, and disability insurance and PTO as well as free parking at our New Haven location.

Principals only.
