Safari for Krokodil/Hippo 2026

Hunting Area Simbabwe

Hunting Area

Our hunting grounds are located in the world-famous Save Valley, at the southern end of Save Valley National Park. Here, you'll hunt mature, old buffalo and exceptionally powerful crocodiles and hippos. With the appropriate license, you'll also have access to a wide variety of plains game. Wetlands and volcanic hill formations combine to create a breathtaking backdrop and rich biodiversity.

Croc and Buffalo Safari

You will hunt Crocs at the Bait. The Crocs have to leave the water in order to get to the Bait and will be hunted from a Blind.

The Cape buffalo is considered one of the most sought-after trophies on the African continent. Its imposing appearance, unbridled strength, and fighting spirit, as well as the varied and exciting hunt, are what make buffalo hunting so appealing. There are various subspecies of the African buffalo, which—despite belonging to the same family—cannot be compared in terms of trophy type and size, physique, and behavior. The Cape buffalo (Syncerus caffer caffer) is the largest and most widespread subspecies of the African buffalo. Its range extends from southern Africa through East Africa—including Kenya—all the way to Somalia. Hunting this subspecies is considered a classic among buffalo hunts. In Save Valley, the average size of buffalo trophies is 38-40 inches! . Enjoy an exciting hunt in our hunting area in Simbabwe. The game population is excellent, and you'll be guided by a professional hunter who is highly experienced in hunting buffalo, hippo, and crocodile.

Arrangement for 10-day Safari for Krokodil and Hippo in Simbabwe:
