

DuraPack® System

PACKRYT® BRG and STRUCTURAL LANTERN RING (SLR®) with PACKING

Innovative hybrid bearing and non-collapsible lantern ring sealing system

Patented Technology

SealRyt® developed the DuraPack® System as an innovative hybrid system that combines the bearing support of a PackRyt® with our patented Structural Lantern Ring (SLR®) System. When paired together, you get shaft stability and excellent flush capacity in a package that won't crush or shift inside the stuffing box. Additionally, the unique design of the SLR® resists clogging and is removable for easy cleaning and maintenance.

NOW
AVAILABLE WITH

ExtractPRO™
TECHNOLOGY

*Patented

- Bearing with Separate Lantern Ring
- Lantern Ring Section is Removable for Cleaning
- SealRyt® Developed Bearing Compounds - Tried and Tested
- SealRyt® Developed Braid Configurations and Textiles
- Pre-cut, Die-formed, and Accurate
- Custom Made for Each Application
- No Waste. No Errors.
- Multiple Bearing, Lantern Ring, Packing Configurations
- Non-collapsible in Service
- Usable in Worn Throat Equipment
- Bearing Stabilization
- Improved Flow and Pressure Equalization
- Decreased Flow Turbulence

*ExtractPRO™ AVAILABLE FOR BRG BEARING PORTION

SealRyt® Bearing Sealing Systems

NOW AVAILABLE WITH ExtractPRO™ Technology

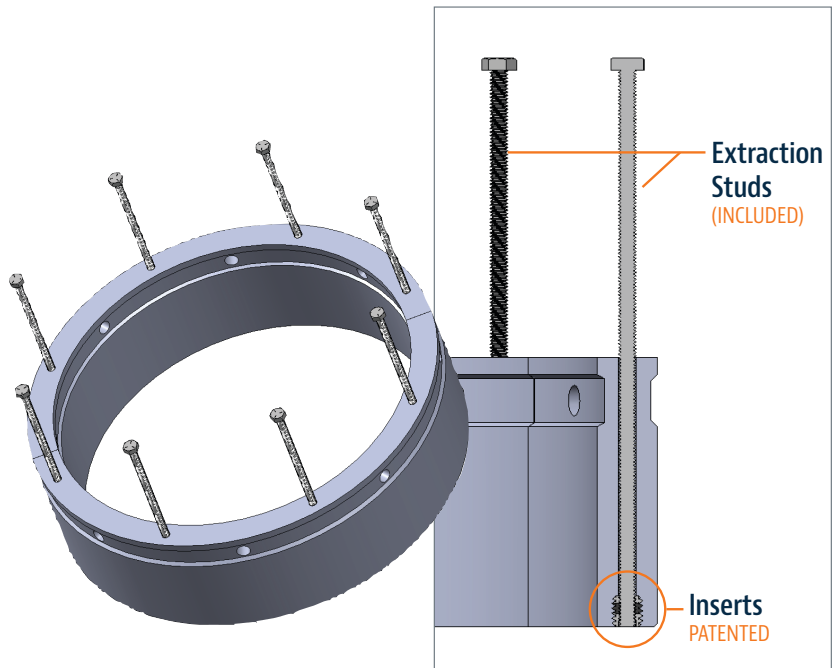

Patented Technology

The PackRyt® Sealing System is now available with ExtractPRO™ Technology. PackRyt® Bearings are designed to have, and rely on, precision fit. Our engineers have developed a patented system for extracting the bearings that does not affect the performance or fitment of the PackRyt® but will enable the bearing to be easily removed for any reason using standard tools.

ADVANTAGES

- ExtractPRO's unique design PUSHES the bearing out.
- Extraction studs included
- Made from 316 Stainless Steel
- SealRyt's innovative design does not loosen as you tighten extraction studs

**ASK YOUR SEALRYT® SALESPERSON ABOUT ADDING
EXTRACTPRO™ TO YOUR BEARING SYSTEM.**

SealRyt® METAL WORK

GLAND FOLLOWERS

INTERLOCKING DESIGN AND CUSTOM MILLED

In a plant environment, gland followers get damaged, factory castings are no longer available, plants decide to remove their mechanical seals, or original followers are misplaced; SealRyt® can custom-make a gland follower for precisely what you need.

We manufacture gland followers with an interlocked design, using only the highest quality materials. This process ensures a high-quality part which fits and performs every time.

SealRyt® FLOW SYSTEMS

FLOW SYSTEMS & INDICATORS

PRECISION FLUSH FOR MAXIMUM RELIABILITY

SealRyt® designs and installs custom flow systems that work with your application. Without knowing flush amount and pressure it's almost impossible to create a stable sealing system that performs at optimum levels. We recommend flow systems for all applications in order to achieve maximum reliability.

SealRyt® TOOLS

TOOL FOR CUTTING, SEATING & PACKING

INSTALLATION & EXTRACTION

SealRyt® curates collections of hand-picked and custom made tools for cutting, packing seating, and packing maintenance tool kits.

Available:
SEALRYT® TOOL KIT
SEALRYT® PACKING SEATING KIT
SEALRYT® GUILLOTINE CUTTER
