

FlowRyt™

Flush Monitoring and Management System

FEATURES

- Clog-free, digital clamp-on flow sensor
- Compact, all-in-one flow monitoring system
- Hybrid detection ensures accurate readings—even in turbulent or contaminated water
- Programmable high and low flow indicators
- Onboard data logging with up to 1 year of storage
- IO-Link, analog, Modbus/TCP, EtherNet/IP® compatible.

STANDARDS

- ¾" FNPT unions for easy installation
- High clarity, vibration and corrosion resistant pressure gauges
- All Stainless - high pressure construction
- Integrated check valve and ball valve for one-way flow control
- Digital and analog output capability
- Built in temperature sensor

APPLICATIONS

- Core operational and mission-critical equipment
- Fiber Line Systems
- Water conservation studies and reduction initiatives
- Pumps, Agitators, Mixers, Etc.

REQUIRES

- Power: 20-30V DC – 1 Amp.
