Solution Brief

WWT & VAST Data Delivering the AI-Driven Enterprise

The Promise of AI-Enabled Discovery

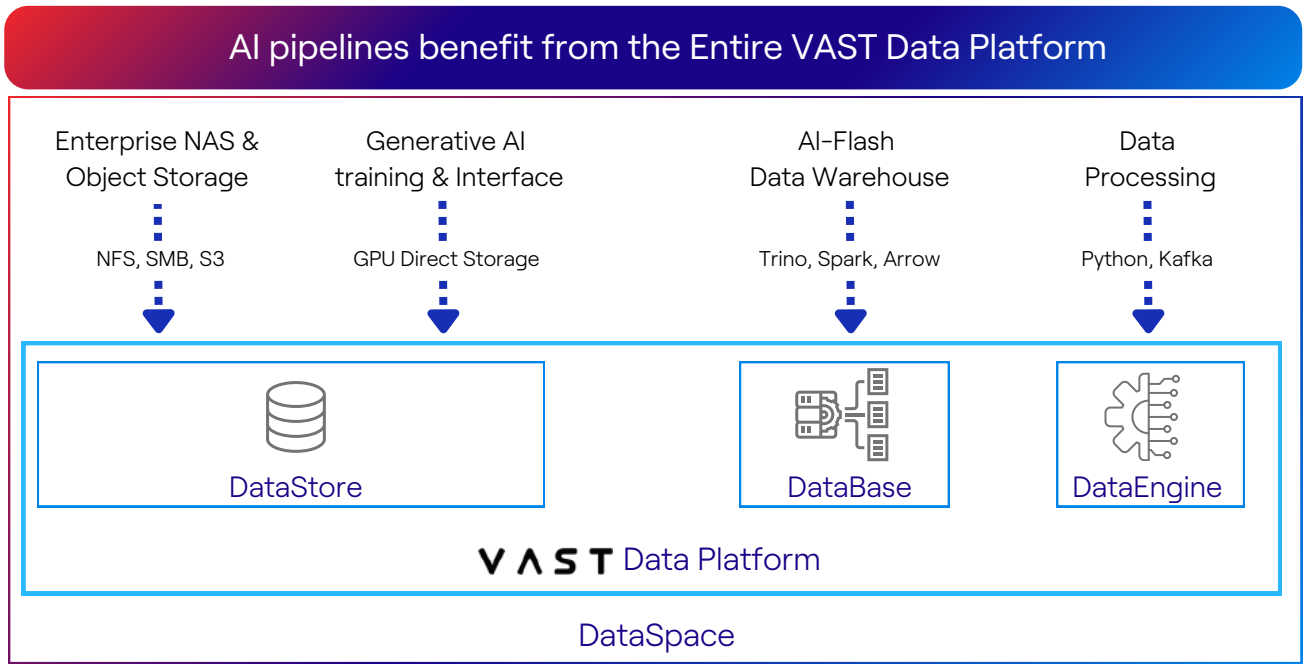
Enterprise customers recognize AI's critical role in driving competitiveness and growth but often encounter significant barriers in transitioning from concept to operational reality. Skills shortages and infrastructure challenges hinder the path to full-scale AI adoption, delaying their ability to leverage AI effectively.

WWT and VAST Deliver the AI Foundation for the Modern Enterprise

WWT and VAST Data are partnering to simplify the journey to AI for enterprise organizations. WWT's Analytics and AI team are helping customers build and execute comprehensive AI/ML solutions leveraging the VAST Data Platform to deliver actionable business insights, enhance customer experiences, drive operational efficiencies, and competitive edge.

As AI takes its place in production systems enterprise customers are demanding security, reliability, and ease of use capabilities that weren't possible with the legacy solutions classically deployed for AI and HPC workloads. VAST's revolutionary architecture provides the performance, scale, and versatility to support next-gen workloads such as generative AI and Deep Learning on a zero-trust platform.

Game-changing data reduction technology, low overhead protection codes, and operational efficiencies make it affordable for customers to make 100% of their data AI-ready by streamlining AI pipelines for faster insights and lower TCO.



Key Solution Areas:

HPC & AI Storage Systems

Streamlined pipelines that deliver insights faster with lower TCO. End-to-end solution differentiated with zero trust security and enterprise simplicity.

Data Lake Modernization

All-flash performance, archive economics with query engine acceleration that reduces compute requirements.

Cyber Resilience

Recover from ransomware at the speed of flash. Certified with leading data protection solutions best in class data reduction.

WWT and VAST Data are helping innovative organizations transform data into actionable insights

WWT's Advanced Technology Center (ATC) is a collaborative ecosystem where enterprise customers can experience the benefits of the VAST Data Platform. Customers can gain hands-on experience with AI-ready infrastructure powered by VAST software and guided by WWT experts to explore and evaluate solutions customized to their specific needs.

About VAST

VAST Data is the data platform software company leading business into the AI era. Accelerating time-to-insight for workload-intensive applications, the VAST data platform delivers scalable performance, radically simple data management and enhanced productivity. Launched in 2019, VAST is the fastest-growing data infrastructure startup in history.

About WWT

World Wide Technology (WWT) is a $20B systems integrator that brings an innovative and proven approach to how large public and private organizations explore, evaluate, architect and implement multi-vendor solutions. Customers have hands-on access to cutting-edge data center, networking, security and collaboration products through WWT's Advanced Technology Center; technical expertise from an expansive team of engineering resources; and accelerated global product delivery, powered by a sophisticated supply chain management infrastructure.

Advanced Technology Center

WWT's Advanced Technology Center (ATC) is a robust, collection of physical lab environments with investment from over 120 vendors — virtualized to facilitate a collaborative ecosystem enabling design, build, education and validation of technology products and integrated architectural solutions.

The ATC enables our clients and partners to make smart technology decisions faster and mitigate the risks inherent in solving complex business challenges with even more complex technology solutions
