celeriti

ABOUT

ABOUT CELERITI

Where AI, ERP and data meet. Architected to scale.

More than 20 years of SAP transformation, automation and workflow expertise, and three years of designing SAP solutions with AI built into the enterprise architecture.

WHO WE ARE

Founded by IT and industry business experts.

Hands-on experience across the platforms organizations depend on, combined with industry experience in finance, procurement, HR, supply chain and asset management.

Enterprise apps

SAP · Oracle · Microsoft

Cloud platforms

Azure · AWS · Google Cloud

AI and data

Machine learning · Generative AI · Data science

Security

Cybersecurity · Data protection

OUR POINT OF VIEW

AI is not a shortcut around complexity. It reveals it.

If your data is fragmented,	AI will expose it.
If your architecture is fragile,	AI will expose it.
If governance is unclear,	AI will expose it.
If your ERP carries technical debt,	AI will expose it.

The enterprise must be architected for AI, so it works with the core instead of around it.

OUR TRACK RECORD

20+ YEARS — LAST 3 YEARS

SAP transformation & automation
Implementations, upgrades and ECC 6.0 to S/4HANA migrations, with deep workflow expertise.

AI in the architecture
SAP solutions with AI built into the enterprise architecture.

THE CELERITI ADVANTAGE

Built for organizations where mistakes are expensive.

We understand enterprise reality.

Legacy systems, imperfect data and compliance are where AI has to work.

We speak executive and technical.

Complexity turned into decisions leaders can fund and govern.

We work across platforms.

SAP, Oracle, Microsoft and the clouds. Advice follows your landscape.

We think, then deliver.

The right decision first, carried through to production.

Get clear before your next major technology investment.

Platforms we specialize in: SAP, Oracle, Microsoft, Azure, AWS, Google Cloud, Snowflake, JiVS and leading AI models.
