AI READINESS

ENTERPRISE AI & ERP READINESS SPRINT

Ready for AI?
Know before you scale.

A focused two-week assessment of whether your SAP, data, processes, architecture and governance can support secure, valuable AI. You leave with an executive-ready plan.

2 weeks	6 dimensions	7 deliverables	Independent
fixed duration	of readiness assessed	each built for a decision	findings, never shaped by a sale

THE OLD QUESTION

Can we use AI?

THE BETTER QUESTION

What needs to be true for AI to work here?

WHAT WE ASSESS Six dimensions of readiness.

01 Data
Clean, owned and reliable enough for AI to act on?

02 ERP & architecture
Which SAP dependencies and clean-core gaps limit AI?

03 Platform
AI services configured, licensed and governed?

04 Governance & risk
Ownership, identity, security, audit, oversight.

05 Use-case viability
What is valuable and feasible now, and what will stall.

06 Executive alignment
Which decisions leadership must make, in what order.

WHAT YOU RECEIVE
Seven deliverables. Each built for a decision.

01 AI readiness scorecard
02 Data & architecture risk review
03 Priority AI use-case map
04 ERP & integration findings
05 Governance & ownership gaps
06 90-day execution roadmap
07 Executive decision brief

TWO WEEKS. TWO PHASES.

FIXED SCOPE

Week 1 · Discover & assess
Interviews, architecture review and data readiness sessions.

Week 2 · Findings & roadmap
Scorecard, risks, use cases and decisions, presented to leadership.

After two weeks, you will know

- ✓ Where AI creates the most value
- ✓ Which use cases move now, and which wait
- ✓ Where your ERP and data are not ready
- ✓ What happens in the next 90 days

Make your next AI decision with clarity.

For CIOs, CTOs, CDOs, SAP leaders and executive teams weighing AI investment.
