Data Governance Made Easy with Matillion + ALTR

Data governance has become the cornerstone of sensitive and flexible data security policies and practices as organizations increasingly invest more resources to become data-driven, maximizing productivity and driving revenue. The data governance market is expected to grow to $7.5 billion in 2025 at a rate of 22.3% per year.*

Why implement a comprehensive data governance strategy in the cloud?

Secure Vulnerable Data
Secure data with automated and proactive processes.

Increase Data Visibility
A complete picture of the data lifecycle makes it easy to monitor, analyze, and discover new value.

Build Deep Trust in Data
Compliant and reliable data leads to accurate conclusions and confident decision making.

Matillion's Automated Metadata Integration with ALTR

Manage and secure sensitive data assets and set centralised data security policies so you can be confident your data is protected at all times.

MATILLION | ALTR

Matillion's integration with ALTR empowers your data governance policy

Automate it

Automate governance policies to manage risk and safeguard your bottomline.

Increase Data Visibility

A complete picture of the data lifecycle makes it easy to monitor, analyze, and discover new value.

Build Deep Trust in Data

Compliant and reliable data leads to accurate conclusions and confident decision making.

Mask and tokenize data assets at the earliest opportunity, even from the most privileged admin users, to **protect highly sensitive data.**

Get immediate visibility into each request for governed data and **insights into normal and abnormal data patterns to better visualize and understand your entire data landscape at scale.**

Quickly get visibility into your organization's data usage, breaking down silos and making **previously hidden data visible to reduce vulnerabilities.**

Enforce **data compliance** around the clock to **prevent and detect violations** of rules that result in costly fines and lawsuits.

Easily control and **secure sensitive data** by using **a central area to set policy** so you can proactively **mitigate risk** before it negatively affects revenue.

Establish standards for data access, use, and integrity to increase efficiency and ensure the entire org is compliant.

Increase data productivity in Matillion by leveraging ALTR's governance platform

Data Masking & Tokenization

Data Privacy

Data Classification
