INDUSTRIAL CLEANER AND DEGREASER

Miraclean B-153

Intensive cleaning for maximum performance.

An advanced formula developed for professional use, strong on dirt and safe for surfaces. B-153 is a biodegradable industrial cleaner and degreaser that removes stubborn grease, oil and industrial soiling from metal, painted and plastic surfaces and from every type of industrial floor.

Miraclean B-153

Refill canister · 5 L

HOW TO USE

Ready to use, no dilution needed.

01
Spray
Apply directly to the soiled surface.

02
Wipe
Wipe with a cloth or sponge.

03
Rinse
Rinse with water if needed.

ABOUT THE PRODUCT

Along with its cleaning power, B-153 is highly biodegradable and meets current environmental protection standards.

After application it leaves an invisible protective film that repels dirt. The film slows down new grease deposits, which extends the intervals between cleanings, saves time and lowers maintenance costs.

APPLICATION

Professional use in industrial plants, workshops and service centres: maintenance of machines, tools, metal, plastic and painted assemblies, and industrial floors after lubricant or oil spills.

PACKAGING

Spray bottles for daily work and a 5 L refill canister for volume, for workshops, industry and transport.

KEY BENEFITS

Highly biodegradable formula
An environmentally responsible choice with full cleaning strength.

High efficiency degreasing
Strong action that does not damage treated surfaces.

Fast acting
Immediate results that save time on every job.

Multi surface use
Safe on a wide range of materials and surfaces.

Long lasting protection
A protective film delays new soiling and reduces how often surfaces need cleaning.

INDUSTRIAL HAND SOAP

Miraclean Industrial Hand Soap

Extreme hand care for extreme conditions.

A new generation liquid soap for stubborn industrial dirt, grease, oil and soot. The formula with hyaluronic acid, panthenol and urea cleans and cares for the skin in the same wash, and regular use over 28 to 30 days supports skin renewal and improves its appearance.

Industrial Hand Soap

Bottle · 100 ml

Industrial Hand Soap

Pump bottle · 1 L

Industrial Hand Soap

Canister · 5 L

DOSAGE AND YEARLY USE

Pump dose 2 ml. A 1 L pack covers up to 500 washes with water or 200 without.

2 to 4 ml
Per wash
With water.

4 to 8 ml
Per wash
Without water.

3 to 4 L
Per year
With water, at 4 to 8 washes a day.

5 to 6 L
Per year
Without water, at 4 to 8 washes a day.

ABOUT THE PRODUCT

Unlike traditional industrial pastes and harsh cleaners, the soap contains no abrasive particles and causes no microscopic damage to the skin. With no solid abrasives it is highly biodegradable and does not clog drains or pipes.

APPLICATION

Production plants, car service workshops, workshops, heavy industry and every professional who needs to clean heavily soiled hands while protecting the skin.

ACTIVE CARE INGREDIENTS

Urea and hyaluronic acid Hold moisture in the deeper layers of the skin.

Panthenol Restores and soothes damaged, dry skin.

Glycerin Adds hydration and softness.

Lauryl glucoside A mild cleanser on a natural, plant base.

KEY BENEFITS

Eco friendly, biodegradable formula
Made from certified raw materials and does not pollute the environment.

Drain safe
No solid abrasive residue, so no blocked drains.

Dermatologically tested
Gentle on skin and safe for everyday use.

Intensive care and regeneration
Urea and hyaluronic acid hold moisture, panthenol restores damaged, dry skin.

Powerful degreasing
Removes heavy grease, even with cold water.

No irritation
No harsh scrubbing agents, so no cracking or tight skin after washing.
