

Primary Location of work: Fort St. John, BC

Position: Environmental Professional – Jr / Int / Sr

Prospect is seeking an individual to join our team to support our ongoing and upcoming projects in our Fort St. John office. We are looking for team members that are generally field focused, but someone with an aptitude for office would also be considered for a hybrid position.

Vision

Prospect Land + Environmental focuses on continued growth in western Canada, without sacrificing quality and integrity, or compromising our unwavering commitment to stakeholders including clients, landowners, and communities.

Mission

Prospect Land + Environmental strives to provide close to community, relationship-based services from project inception through to site restoration. Prospect's integrated approach ensures project success with our experienced team of professionals. This is the Prospect advantage.

Responsibilities

- Conduct field work and support reporting for the following scopes of work:
 - Stage 1/Phase 1 Site Investigation
 - Stage 2/Phase 2 Site Investigation
 - Detailed Site Investigation
 - Groundwater Monitoring
 - Remedial Action Plans
 - Remediation Summaries
 - Spill response
 - Reclamation & post reclamation
 - Pre-Construction Environmental Assessments
 - Schedule A Assessments
 - Schedule B Assessments
 - Streams and Wetland Assessments
- Timely completion of field data uploads
- Provide support relating to the above reports, which may include preparation of appendices, data tabulation, preparing figures, etc.
- Support ongoing development and continuous improvement of report templates
- Work is focused on British Columbia programs, with some work relating to Alberta sites

A successful candidate will possess a combination of the following skills and qualifications:

- Degree or diploma within environmental sciences, geosciences, biology, agrology or similar
- Has current designation, or articulating in one or more of the following: Agrology, Biology, Engineering/Hydrogeology, or similar, per the Professional Governance Act in BC.
- Has standard safety training: H2S, Intermediate First Aid with Transportation Endorsement, Class 5 Drivers License, CSO, etc.
- Two or more years in environmental consulting
- Strong understanding of the BC regulations
- Experience preparing above noted reports
- Excellent technical writing and operation of Microsoft suite of programs

Prospect offers an excellent compensation package including:

- Competitive wages based on education and experience
- Employee and Family Assistance Program
- Comprehensive employer paid benefits package
- Professional Development and Education Program
- RRSP Matching
- Work from home days
- Paid Sick Leave
- Free parking

Thank you for your application. Only potential candidates will be contacted for interviews. References are required.
